The Pentium Chronicles Oxford University Press Welcome to the world of the naked corporation. Transparency is revolutionizing every aspect of our economy and its industries and forcing firms to rethink their fundamental values. We are in an extraordinary age where businesses must make themselves clearly visible to shareholders, customers, employees, partners, and society.

Financial data, employee grievances, internal memos, environmental disasters, product weaknesses, international protests, scandals and policies, good news and bad; all can be seen by anyone who knows where to look. Don Tapscott, bestselling author and one of the most sought after strategists and speakers in the business world, is famous for seeing into the future and pointing out both its forest and its

trees. David Ticoll, visionary researcher, columnist, and consultant, has identified countless breakthrough trends at the intersection of technology and business strategy. These two longtime collaborators now offer a brilliant guide to the new age of openness. In *The Naked Corporation*, they explain how the new transparency has caused a power shift toward customers, employees, shareholders,

---

and other stakeholders; how and where information has exploded; and how corporations across many industries have seized on transparency not as a challenge but as an opportunity. Drawing on such examples as Shell Oil 's reinvention of itself as an environmentally focused business, to Johnson & Johnson 's longstanding and carefully nurtured reputation as a company worthy of trust—as well

as little-known examples from pharmaceuticals, insurance, high technology, and financial services—Tapscott and Ticoll offer invaluable advice on how to lead the new age, rather than simply react to it. The Naked Corporation is a book for managers, employees, investors, customers, and anyone who cares about the future of the corporation and society. Industrial Accelerators and Their Applications Lowell House It's been known

for years that usability testing can dramatically improve products. But with a typical price tag of \$5,000 to \$10,000 for a usability consultant to conduct each round of tests, it rarely happens. In this how-to companion to Don't Make Me Think: A Common Sense Approach to Web Usability, Steve Krug spells out a streamlined approach to usability testing that anyone can easily apply to their own Web site, application, or other product. (As he said in Don't Make Me Think,

---

"It's not rocket surgery".) Using practical advice, plenty of illustrations, and his trademark humor, Steve explains how to: Test any design, from a sketch on a napkin to a fully-functioning Web site or application. Keep your focus on finding the most important problems (because no one has the time or resources to fix them all) Fix the problems that you find, using his "The least you can do" approach. By paring the process of testing and fixing products down to its

essentials ("A morning a month, that's all we ask"), Rocket Surgery makes it realistic for teams to test early and often, catching problems while it's still easy to fix them. Rocket Surgery Made Easy adds demonstration videos to the proven mix of clear writing, before-and-after examples, witty illustrations, and practical advice that made Don't Make Me Think so popular.
