Based on real-world testing over time, it will help you make intelligent, informed decisions about buying, building, upgrading, and repairing PCs in a cost effective manner that will help you maximize new or existing computer hardware systems. It's loaded with real-world advice presented in a concise style that clearly delivers just the information you want, without your having to hunt for it.

Accelerating MATLAB with GPU Computing Jeffrey Frank Jones Provides direct access to the skills, insights and techniques of some of the postproduction industry's most prominent digital

video colorists, delivering practical skills to the postproduction pro seeking to improve their color grading craft. The author interviews and observes 8 professional colorists as they grade a series of real world video images, describing the methods and techniques each artist uses to reach their finalized image.

These video images are included on a DVD that allows you to work lockstep with each artist as they grade their images. Though some tools provided may differ from one product to the next, the basic process of video color correction (grading) remains the same. Application agnostic and sure to inspire, *The Art of Digital Video Color Correction* will further your artistic skills, whether you're an editor, compositor, or colorist, and allow you to apply those skills to the grading process, making your finished image sharper, crisper and more aesthetically pleasing in general.

Autonomous and nonautonomous Chua's circuits are of special significance in the study of chaotic system modeling, chaos-based science and engineering applications. Since hardware and software-based design and implementation approaches can be applied to Chua's circuits, these circuits are also excellent educative models for studying and experimenting nonlinear dynamics and chaos. This book not only presents a collection of the author's published papers on design, simulation and implementation of Chua's circuits, it also provides a systematic approach to practising chaotic dynamics.

Every Canadian town has a hockey story, and Ron MacLean has a hockey story for every town. A new book by the co-author of the national bestseller *Cornered*.

When you first meet Ron

---

MacLean, he asks where you ' re from, and he always comes back with a story. No one has crossed this country more than MacLean. In his 28 years on Hockey Night in Canada and now as host of Rogers ' Hometown Hockey, Ron has met fascinating people from coast to coast and has great stories to tell. Now, in this new book, MacLean is back, with brand new tales from across the country. These are stories you ' ve never heard before. From London to Castlegar, Yellowknife to Cole Harbour, Medicine Hat to Trois Rivieres, from Bantam to Junior B to the NHL, our country is full of great characters: Players, coaches, hockey moms and hockey dads; rivalries, practical jokes, careers that grew out of nothing and "can ' t lose" prospects who flamed out too soon; spectacular triumphs, heart-breaking tragedies and tales of friendship, betrayal, love and loyalty—all compelling, entertaining and inspiring. Once again working with Kirstie McLellan Day, co-author of the blockbuster bestsellers *Playing With Fire*, *Tough Guy* and *Cornered*, this is MacLean at his finest. *Shakespeare the Dramatist* CRC Press  
Successful hedge fund

investing begins with well-informed strategy *A Guide to Starting Your Hedge Fund* is a practical, definitive "how-to" guide, designed to help managers design and launch their own funds, and to help investors select and diligence new funds. The first book to examine the practical aspects of setting up and operating funds with a focus on energy commodity markets, this book scrutinises the due diligence process and comprehensively reviews the opportunities and risks of all energy commodity markets as hedge fund investments. Extensive planning and strategy advice prove invaluable to prospective fund managers and investors alike, and detailed discussion of the markets' constraints help inform procedural decisions. Readers gain insight into practical matters including legal and commercial structures, due diligence, fund raising, operations, and more, allowing them to construct a concrete investment plan before ever touching a penny. Asset managers are looking to energy commodities to provide attractive uncorrelated – if volatile – returns. These high returns, however, are accompanied by high risk. Few investors have experience evaluating these investment

opportunities, and few prospective fund managers understand the market fundamentals and their associated risks. This book provides the answers sorely lacking in hedge fund literature, giving investors and fund managers the background they need to make smarter decisions. Understand the markets' structures, opportunities, and risks. Develop a comprehensive, well-informed investment strategy. Conduct thorough due diligence with a detailed plan. Examine the practical aspects of fund raising, legal and tax structure, and more. Oil has long been traded by hedge funds, but electricity, the fuels that generate electricity, and the environmental products like emissions allowances and weather derivatives have become the new "hot" investment strategies. These high returns come with higher risk, but *A Guide to Starting Your Hedge Fund* ensures participants have essential information at their disposal. *Selecting Thermoplastics for Engineering Applications*, Second Edition, Lulu Press, Inc. This new edition covers the City and Guilds 2365-03 course, updated in line with the 18th Edition of the Wiring Regulations. Written in an accessible style with a chapter

dedicated to each unit of the syllabus, this book helps you to master each topic before moving on to the next. This new edition includes information on construction and demolition sites, fire proofing, energy efficiency and LED lights, as well as some updated diagrams. End of chapter revision questions help you to check your understanding and consolidate the key concepts learned in each chapter.

- Full colour diagrams and photographs explain difficult concepts
- Clear definitions of technical terms make the book a quick and easy reference
- Extensive online material helps both students and lecturers

The companion website contains videos, animations, worksheets and lesson plans, making it an invaluable resource to both students and lecturers alike.

Co-written by the author of the best-seller *An Aid to the MRCP Short Cases* this new, systematically organized text concentrates on examples that are frequently examined in the MRCP Part 2 written examination - saving candidates time during revision and enabling them to concentrate on weaker specialities. By including high quality images and labelling abnormal findings on the original images, the authors enable the reader to feel confident about recognizing specific radiological abnormalities, instead of guessing where the abnormality lies. In order to avoid guessing, the reader is asked to describe the radiological

findings in each case. In the Question section, each page is dedicated to an X-ray and sample questions. An Answer section, with further radiographs to highlight variations and details, is given at the end of the book to provide background knowledge.

How much risk should we take? **A Short Guide to Risk Appetite** sets out to help all those who need to decide how much risk can be taken in a particular risky and important situation. David Hillson and Ruth Murray-Webster introduce the RARA Model to explain the complementary and central roles of Risk Appetite and Risk Attitude, and along the way they show how other risk-related concepts fit in. Risk thresholds are the external expression of inherent risk appetite, and the challenge is how to set the right thresholds. By progressively deconstructing the RARA Model, the authors show that

---

the essential control step is our ability to choose an appropriate risk attitude. The book contains practical guidance to setting risk thresholds that take proper account of the influences of organisational risk culture and the individual risk preferences of key stakeholders. Alongside this, individuals and organisations need to choose the risk attitude that will optimise their chances of achieving the desired objectives.
