With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In *Camera* is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejiike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually being replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now being replaced by heavy trucks and lorries. African traditional methods of healing are now being substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

The Darkroom Cookbook Taylor & Francis

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

World renowned psychologist Robert Sternberg presents a fresh and compelling picture of the creative process from the inception of an idea to its ultimate success. With illuminating examples, Sternberg reveals the paths we all can take to become more creative and shows how institutions can learn to foster creativity. "What is creative is new and often brings about positive change. But what is new is also strange, and what is strange can be scary, even threatening—which is why 'they' don't want to hear it. But they are unwise not to listen, for the creative person with original ideas is the one who, with support, will advance and improve the milieu to the benefit of all." —from *Defying the Crowd*

"If only more new media commentators had this level of historical-critical reference, engaging, good stories, and a degree of wonder at what media and windows bring to the city, to life." - John Hutnyk, Goldsmiths, University of London "Just when you thought the last word had been said about cities and media, along comes Scott McQuire to breathe new life into the

debate. When revisiting existing pathways, his always ingenious eyes produce startling and original insights. When striking out into new territory, he opens up before us inspiring new vistas. I love this book." - James Donald, University of New South Wales "A book that crams into a single chapter more insights and illustrations than seems feasible, yet which ties all threads together through a consistent, theoretically rich analysis of the interplay of media and city... Writing with effusiveness uncharacteristic of back-cover blurbs on academic tomes, James Donald says ?I love this book?. But I will end by echoing his praise, and make a promise to readers: you will love *The Media City*, too." - European Journal of Communication "Refreshingly clear, getting to grips with some of the key concepts of urban sociology in a way that moves beyond the wistful evocation and splatter of undigested terms that characterises so much academic writing on culture and cities." - Media, Culture & Society Significant changes are occurring in the spaces and rhythms of contemporary cities and in the social functioning of media. This forceful book argues that the redefinition of urban space by mobile, instantaneous and pervasive media is producing a distinctive mode of social experience. Media are no longer separate from the city. Instead the proliferation of spatialized media platforms has produced a media-architecture complex - the media city. Offering critical and historical analysis at the deepest levels, *The Media City* links the formation of the modern city to the development of modern image technologies and outlines a new genealogy for assessing contemporary developments such as digital networks and digital architecture, web cams and public screens, surveillance society and reality television. Wide-ranging and thoughtfully illustrated, it intersects disciplines and connects phenomena which are too often left isolated from each other to propose a new way of understanding public and private space and social life in contemporary cities. It will find a broad readership in media and communications, cultural studies, social theory, urban sociology, architecture and art history. Winner of the 2009 Jane Jacobs Urban Communication Award, awarded by the Urban Communication Association.
