Whilst the demand for ever smaller and more powerful wireless devices increases, as does the importance of designing and engineering smaller antennas to fit these devices. Antennas for Portable Devices provides a complete and cutting-edge guide to the design and engineering of small antennas for portable electronic devices such as mobile phone handsets, laptop computers, RFID (radio frequency identification), microwave thermal therapies devices, wearable devices, and UWB (ultra-wideband) based consumer devices. The book addresses practical engineering issues that antenna professionals have to deal with. It explains the immediate demands for existing systems; discusses the antenna technology for the latest and emerging applications, and gives comprehensive coverage of hot topics in the wireless industry. Issues including design considerations, engineering design, measurement setup and methodology, and practical applications are all covered in depth. The Change Process in Psychotherapy During Troubling Times invites readers to consider what it is psychotherapists do that leads to change. The book highlights different theoretical approaches, questions old paradigms, and illustrates the change process when working with people facing a range of life challenges such as the survivors of childhood trauma, refugees, and people dealing with traumatic loss. Moving between consideration of micro-moments when working with individual clients and bigger questions about how to promote change in the face of current world problems, it addresses issues that touch us all. At the same time, the book acknowledges the unprecedented challenges in today's world such as the pace of change, the thousands of displaced people who seek

refuge in other countries, the illness and loss caused by the coronavirus pandemic, and the impact of climate change on lifestyles and the environment. The book presents a topical consideration of the relevance of therapeutic assumptions, theories, and practices to current global crises. With the breadth of presenting issues considered and the examples of a variety of creative approaches supporting change, the book will be useful to psychotherapists in practice and in training working in a range of settings with different populations. It will also be of interest to others working in the helping professions.

Panasonic Lumix DMC FZ300/FZ330 User's Manual (B&W) David Scott Johnson

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £ 10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up

by Janey and her team and saved.

The Panasonic DMC-Fz1000 User's Manual Little, Brown Genesis 2:18 (GW) Then the Lord God said, "It is not good for the man to be alone. I will make a helper who is right for him." The first institution that God created on earth was the institution of marriage. This was to be the place where a man and a woman would fulfill God's mandate of dominion, for their lives as one. Through this institution, man would love His wife unto God and the woman would submit to her husband unto God. The wife was to help her husband with the vision God had given them for their family. When God creates anything and makes it the "first", He never changes His mind. He never needs to substitute it with something else in order for the world to keep moving. When God set the parameters for marriage, He meant it. The book, The Wife Factor, is a life-changing resource that every WIFE should have! The words of the book will assist you as you assist your husband. The WIFE authors of this book tell their own stories of losses and victories in marriage. While, the Literary Lead, Candace Ford, gives you the necessary tools of how to be a WIFE Factor, properly helping your husband and your family walk in the plan and purpose designated by heaven.

The Audio Expert is a comprehensive reference that covers all aspects of audio, with many practical, as well as theoretical, explanations. Providing in-depth descriptions of how audio really works, using common sense plain-English explanations and mechanical analogies with minimal math, the book is written for people who want to understand audio at the deepest, most technical level, without needing an engineering degree. It's presented in an easy-to-read, conversational tone, and includes more than 400 figures and photos augmenting the text. The Audio Expert takes the intermediate to advanced recording engineer or audiophile and makes you an expert. The book goes far beyond merely explaining how audio "works." It brings together the concepts

of audio, aural perception, musical instrument physics, acoustics, and basic electronics, showing how they're intimately related. Describing in great detail many of the practices and techniques used by recording and mixing engineers, the topics include video production and computers. Rather than merely showing how to use audio devices such as equalizers and compressors, Ethan Winer explains how they work internally, and how they are spec'd and tested. Most explanations are platform-agnostic, applying equally to Windows and Mac operating systems, and to most software and hardware.

TheAudioExpertbook.com, the companion website, has audio and video examples to better present complex topics such as vibration and resonance.

There are also videos demonstrating editing techniques and audio processing, as well as interviews with skilled musicians demonstrating their instruments and playing techniques.

Jennifer Houle's debut collection, *The Back Channels*, reflects the effort to build a meaningful life in a rapidly changing culture, in a region afflicted, as many are, with outmigration and an economy of anxiety and hard choices. Here, where memories of a more prosperous past loom large, she takes us to the backwoods where a discouraged woman walks, down to the shore beyond the fairgrounds, and into the parking lots where smokers gather to talk about layoffs or pay cuts. Houle's poems invite the reader to listen in on these moments and

pause among these landscapes, never mistaking its often rural settings for places of retreat or escape. The largely Acadian culture depicted in these poems may still be influenced by the past, caught in its own reflected image, but it moves, as do the poems, to a steady, if moody, rhythm determined to find meaning and purpose in spite of difficulties, flux, and a seemingly pervasive cynicism. Reminiscent of Karen Solie's early work, Houle's brilliance as a poet is her mastery of language and keen sense of observation with which she draws the reader in. These poems come from a place of grappling, an attempt to find meaning, beauty and connection in the day-to-day, without being confined by it.
