The MSX Red Book Canterbury Press

Norwich
This Anglicized edition was first published in 1995. Adapted by a team of editors in Britain, it does not alter the translation but smooths out the considerable variances between British and American usage. Bound in hardback for durability and with bespoke calligraphy for the title lettering, this attractive pew edition includes the Apocrypha.

International Copyright and Access to Knowledge

The principle of Access to Knowledge (A2K) has become a common reference point for a diverse set of agendas that all hope to realize technological and human potential by making knowledge more accessible. This book is a history of international copyright focused on principles of A2K and their proponents. Whilst debate and discussion so far has covered the perspectives of major western countries, the author's fresh approach to the topic considers emerging countries and NGOs, who have fought for the principles of A2K that are now fundamental to the system. Written in a clear and accessible style, the book connects copyright history to current problems, issues and events.
