The freedom of the seas -- meaning both the oceans of the world and coastal waters -- has been among the most contentious issues in international law for the past four hundred years. The most influential argument in favour of freedom of navigation, trade, and fishing was that put forth by the Dutch theorist Hugo Grotius in his 1609 *Mare Liberum*. The *Free Sea* was originally published in order to buttress Dutch claims of access to the lucrative markets of the East Indies. It had been composed as the twelfth chapter of a larger work, *De Jure Praedae* (On the Law of Prize and Booty), which Grotius had written to defend the Dutch East India Company's capture in 1603 of a rich Portuguese merchant ship in the Straits of Singapore.

This new edition publishes the only translation of Grotius's masterpiece undertaken in his own lifetime -- a work left in manuscript by the English historian and promoter of overseas exploration Richard Hakluyt (1552-1616). This volume also contains William Welwod's critique of Grotius (reprinted for the first time since the seventeenth century) and Grotius's reply to Welwod. Taken together, these documents provide an indispensable introduction to modern ideas of sovereignty and property as they emerged from the early-modern tradition of natural law.

Two wealthy and powerful men engage in a decades-long contest to create and possess the most remarkable watch in history. James Ward Packard of Warren, Ohio, was an entrepreneur and a talented engineer of infinite curiosity, a self-made man who earned millions from his inventions, including the design and manufacture of America's first luxury car—the elegant and storied Packard. Henry Graves, Jr., was the very essence of blue-blooded refinement in the early 1900s: son of a Wall Street financier, a central figure in New York high society, and a connoisseur of beautiful things—especially fine watches. Then, as now, expensive watches were the ultimate sign of luxury and wealth, but in the early twentieth century the limitless ambition, wealth, and creativity of these two men pushed the boundaries of mathematics, astronomy, craftsmanship, technology, and physics to create ever more ingenious timepieces. In any watch, features beyond

the display of hours, minutes, and seconds are known as “ complications. ” Packard and Graves spurred acclaimed Swiss watchmaker Patek Philippe to create the Mona Lisa of timepieces—a fabled watch that incorporated twenty-four complications and took nearly eight years to design and build. For the period, it was the most complicated watch ever created. For years it disappeared, but then it surfaced at a Sotheby's auction in 1999, touching off a heated bidding war, shattering all known records when it fetched \$11 million from an anonymous bidder. New York Times bestselling author Stacy Perman takes us from the clubby world of New York high society into the ateliers of the greatest Swiss watchmakers, and into the high-octane, often secretive subculture of modern-day watch collecting. With meticulous research, vivid historical details, and a wealth of dynamic personalities, *A Grand Complication* is the fascinating story of the thrilling duel between two of the most intriguing men of the early twentieth century. Above all, it is a sweeping chronicle of innovation, the desire for beauty, and the lengths people will go to possess it.
