An innovative study of books and reading that focuses on papermaking in the Renaissance In *The Nature of the Page*, Joshua Calhoun tells the story of handmade paper in Renaissance England and beyond. For most of the history of printing, paper was made primarily from recycled rags, so this is a story about using old clothes to tell new stories, about plants used to make clothes, and about plants that frustrated papermakers' best attempts to replace scarce natural resources with abundant ones. Because plants, like humans, are susceptible to the ravages of time, it is also a story of corruption and the hope that we can preserve the things we love from decay. Combining environmental and bibliographical research with deft literary analysis, Calhoun reveals how much we have left to discover in familiar texts. He describes the transformation of plant material into a sheet of paper, details how ecological availability or scarcity influenced literary output in the sixteenth and seventeenth centuries, and examines the impact of the various colors and qualities of paper on early modern reading practices. Through a discussion of sizing—the mixture used to coat the surface of paper so that ink would not blot into its fibers—he reveals a surprising textual interaction between animals and readers. He shows how we might read an indistinct stain on the page of an early modern book to better understand the mixed media surfaces on which readers, writers, and printers recorded and revised history. Lastly, Calhoun considers how early modern writers imagined paper decay and how modern scholars grapple with biodeterioration today. Exploring the poetic interplay between human ideas and the plant, animal, and mineral forms through which they are mediated, *The Nature of the Page* prompts readers to reconsider the role of the natural world in everything from old books to new smartphones.

America Ascendant Taylor & Francis

The scourge of America's economy isn't the success of the 1 percent—quite the opposite. The real problem is the government's well-meaning but misguided attempt to reduce the payoffs for success. Four years ago, Edward Conard wrote a controversial bestseller, *Unintended Consequences*, which set the record straight on the financial crisis of 2008 and explained why U.S. growth was accelerating relative to other high-wage economies. He warned that loose monetary policy would produce neither growth nor inflation, that expansionary fiscal policy would have no lasting benefit on growth in the aftermath of the crisis, and that ill-advised attempts to rein in banking based on misplaced blame would slow an already weak recovery. Unfortunately, he was right. Now he's back with another provocative argument: that our current obsession with income inequality is misguided and will only slow growth further. Using fact-based logic, Conard tracks the implications of an economy now constrained by both its capacity for risk-taking and by a shortage of properly trained talent—rather than by labor or capital, as was the case historically. He uses this fresh perspective to challenge the conclusions of liberal economists like Larry Summers and Joseph Stiglitz and the myths of “crony capitalism” more broadly. Instead, he argues that the growing wealth of most successful Americans is not to blame for the stagnating incomes of the middle and working classes. If anything, the success of the 1 percent has put upward pressure on employment and wages. Conard argues that high payoffs for success motivate talent to get the training and take the risks that gradually loosen the constraints to growth. Well-meaning attempts to decrease inequality through redistribution dull these incentives, gradually hurting not just the 1 percent but everyone else as well. Conard outlines a plan for growing middle- and working-class wages in an economy with a near infinite supply of labor that is shifting from capital-intensive manufacturing to knowledge-intensive, innovation-driven fields. He urges us to stop blaming the success of the 1 percent for slow wage growth and embrace the upside of inequality: faster growth and greater prosperity for everyone.

Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations, this book addresses “the missing link” between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR “mindset” when developing sustainable business strategies. The book consists of three parts: 1) A theoretical realm which establishes the key concepts and

rationale for the adoption of a sustainable CSR approach, 2) A practical realm which addresses putting CSR and sustainability into business practice, 3) An educational realm which proposes how to incorporate the concepts into teaching and training.

With the increase of digital and networked media in everyday life, researchers have increasingly turned their gaze to the symbolic and cultural elements of technologies. From studying online game communities, locative and social media to YouTube and mobile media, ethnographic approaches to digital and networked media have helped to elucidate the dynamic cultural and social dimensions of media practice. The Routledge Companion to Digital Ethnography provides an authoritative, up-to-date, intellectually broad, and conceptually cutting-edge guide to this emergent and diverse area. Features include: a comprehensive history of computers and digitization in anthropology; exploration of various ethnographic methods in the context of digital tools and network relations; consideration of social networking and communication technologies on a local and global scale; in-depth analyses of different interfaces in ethnography, from mobile technologies to digital archives.

*Making News at The New York Times* is the first in-depth portrait of the nation's, if not the world's, premier newspaper in the digital age. It presents a lively chronicle of months spent in the newsroom observing daily conversations, meetings, and journalists at work. We see Page One meetings, articles developed for online and print from start to finish, the creation of ambitious multimedia projects, and the ethical dilemmas posed by social media in the newsroom. Here, the reality of creating news in a 24/7 instant information environment clashes with the storied history of print journalism, and the tensions present a dramatic portrait of news in the online world. This news ethnography brings to bear the overarching value clashes at play in a digital news world. The book argues that emergent news values are reordering the fundamental processes of news production. Immediacy, interactivity, and participation now play a role unlike any time before, creating clashes between old and new. These values emerge from the social practices, pressures, and norms at play inside the newsroom as journalists attempt to negotiate the new demands of their work. Immediacy forces journalists to work in a constant deadline environment, an ASAP world, but one where the vaunted traditions of yesterday's news still appear in the next day's print paper. Interactivity, inspired by the new user-computer directed capacities online and the immersive Web environment, brings new kinds of specialists into the newsroom, but exacts new demands upon the already taxed workflow of traditional journalists. And at time where social media presents the opportunity for new kinds of engagement between the audience and media, business executives hope for branding opportunities while journalists fail to truly interact with their readers.

Comprehensive Reform for Student Success New York : s.n.

Many efforts have been undertaken to address dysfunctional security sector governance in West Africa. However, security sector reform (SSR) has fallen short of radical - transformational - change to the fundamental structures of power and governance in the region. Looking more closely at specific examples of SSR in six West African countries, *Learning from West African Experiences in Security Sector Governance* explores both progress and reversals in efforts by national stakeholders and their international partners to positively influence security sector governance dynamics. Written by eminent national experts based on their personal experiences of these reform contexts, this study offers new insights and practical

lessons that should inform processes to improve democratic security sector governance in West Africa and beyond.

The Routledge Companion to Digital Journalism Studies offers an unprecedented collection of essays addressing the key issues and debates shaping the field of Digital Journalism Studies today. Across the last decade, journalism has undergone many changes, which have driven scholars to reassess its most fundamental questions, and in the face of digital change, to ask again: ‘Who is a journalist?’ and ‘What is journalism?’. This companion explores a developing scholarly agenda committed to understanding digital journalism and brings together the work of key scholars seeking to address key theoretical concerns and solve unique methodological riddles. Compiled of 58 original essays from distinguished academics across the globe, this Companion draws together the work of those making sense of this fundamental reconceptualization of journalism, and assesses its impacts on journalism's products, its practices, resources, and its relationship with audiences. It also outlines the challenge presented by studying digital journalism and, more importantly, offers a first set of answers. This collection is the very first of its kind to attempt to distinguish this emerging field as a unique area of academic inquiry. Through identifying its core questions and presenting its fundamental debates, this Companion sets the agenda for years to come in defining this new field of study as Digital Journalism Studies, making it an essential point of reference for students and scholars of journalism.

Community colleges face pressure to “do more with less” that have prompted many college leaders to consider fundamental changes to the ways they have typically done business. Because piecemeal solutions have not often been effective or efficient, colleges are moving far beyond discreet “programs” or “interventions,” and are attempting to implement comprehensive reform efforts. This volume conceptualizes comprehensive reform as being marked by: a focus on student success; a theory of change that ties programmatic components together in an intentional and cohesive package, implemented at multiple levels throughout the college and touching the majority of students; and a culture of evidence that uses data to continuously assess programs and processes against student success. Presenting original analyses that describe the rationale for comprehensive reform, this volume examines the challenges involved in implementing, evaluating, and sustaining those efforts. This is the 176th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

“One of the most important books of our modern era” -Amb. Jaime de Bourbon For anyone struggling with conflict, this book can transform you. Negotiating the Nonnegotiable takes you on a journey into the heart and soul of conflict, providing

unique insight into the emotional undercurrents that too often sweep us out to sea. With vivid stories of his closed-door sessions with warring political groups, disputing businesspeople, and families in crisis, Daniel Shapiro presents a universally applicable method to successfully navigate conflict. A deep, provocative book to reflect on and wrestle with, this book can change your life. Be warned: This book is not a quick fix. Real change takes work. You will learn how to master five emotional dynamics that can sabotage conflict outside your awareness: 1. Vertigo: How can you avoid getting emotionally consumed in conflict? 2. Repetition compulsion: How can you stop repeating the same conflicts again and again? 3. Taboos: How can you discuss sensitive issues at the heart of the conflict? 4. Assault on the sacred: What should you do if your values feel threatened? 5. Identity politics: What can you do if others use politics against you? In our era of discontent, this is just the book we need to resolve conflict in our own lives and in the world around us.

NEW YORK TIMES BESTSELLER WASHINGTON POST BESTSELLER Winner of the getAbstract 17th International Book Award "The Seventh Sense is a concept every businessman, diplomat, or student should aspire to master--a powerful idea, backed by stories and figures that will be impossible to forget." -- Walter Isaacson, author of Steve Jobs and Leonardo da Vinci  
Endless terror. Refugee waves. An unfixable global economy. Surprising election results. New billion-dollar fortunes. Miracle medical advances. What if they were all connected? What if you could understand why? The Seventh Sense is the story of what all of today's successful figures see and feel: the forces that are invisible to most of us but explain everything from explosive technological change to uneasy political ripples. The secret to power now is understanding our new age of networks. Not merely the Internet, but also webs of trade, finance, and even DNA. Based on his years of advising generals, CEOs, and politicians, Ramo takes us into the opaque heart of our world's rapidly connected systems and teaches us what the losers are not yet seeing--and what the victors of this age already know.

Across the globe, states have long aimed to control the movement of people, identify their citizens, and restrict noncitizens' rights through official identification documents. Although states are now less likely to grant permanent legal status, they are increasingly issuing new temporary and provisional legal statuses to migrants. Meanwhile, the need for migrants to apply for frequent renewals subjects them to more intensive state surveillance. The contributors to Paper Trails examine how these new developments change migrants' relationship to state, local, and foreign bureaucracies. The contributors analyze, among other things, immigration policies in the United Kingdom, the issuing of driver's licenses in Arizona and New Mexico, the Deferred Action for Childhood Arrivals program, and community know-your-rights campaigns. By demonstrating how migrants are inscribed into official bureaucratic systems through the issuance of identification documents, the contributors open up new ways to understand how states exert their power and how migrants must navigate new systems of governance. Negotiating the Nonnegotiable United Nations  
In this remarkable collection of bite-size

stories, Stuart Dybek, one of our most prodigious writers, explores the human appetite for rapture and for trust. With fervent intensity and sly wit, he gives each tale his signature mix of characters--some almost ghostly, others vividly real--who live in worlds tinged with surreal potential. There are crazed nuns hijacking streetcars, eerie adventures across frozen ponds, and a boy who is visited by a miniature bride and groom every night in his uncle's doomsday compound. Whether they are about a simple transaction, a brave inquiry, a difficult negotiation, or shared bliss, the stories in Ecstatic Cahoots target the friction between our need for ecstatic self-transcendence and our passionate longing for trust between lovers, friends, family, and even strangers. Call it micro-fiction or mini-fiction, flash fiction or short shorts. Whatever the label, the marvelous encounters here are marked by puzzlement, anguish, and conspiratorial high spirits. In this thrilling collection, Stuart Dybek has once again re-envisioned the possibilities of fiction, creating myriad human situations that fold endlessly upon each other, his crackling prose drawing out the strange, the intimate, and the mysterious elements in each.

The Paper Record Taylor & Francis

Providing the most complete record possible of texts by Italian writers active after 1900, this annotated bibliography covers over 4,800 distinct editions of writings by some 1,700 Italian authors. Many entries are accompanied by useful notes that provide information on the authors, works, translators, and the reception of the translations. This book includes the works of Pirandello, Calvino, Eco, and more recently, Andrea Camilleri and Valerio Manfredi. Together with Robin Healey's Italian Literature before 1900 in English Translation, also published by University of Toronto Press in 2011, this volume makes comprehensive information on translations from Italian accessible for schools, libraries, and those interested in comparative literature.

One of the greatest challenges today is to end hunger and poverty while making agriculture and food systems sustainable. The challenge is daunting because of continued population growth, profound changes in food demand, and the threat of mass migration of rural youth in search of a better life. This report presents strategies that can leverage the potential of food systems to become the engine of inclusive economic development and rural prosperity in low-income countries. It analyses the structural and rural transformations now under way, and examines the opportunities and challenges they present to millions of small-scale food producers. It shows how an "agroterritorial" planning approach, focused on connecting cities and towns and their surrounding rural areas, combined with agro-industrial and infrastructure development can generate income opportunities throughout the food sector and underpin sustainable and inclusive rural transformation.

Over the past two decades, experimental economics has moved from a fringe activity to become a standard tool for empirical research. With experimental economics now regarded as part of the basic tool-kit for applied economics, this book demonstrates how controlled experiments can be a useful in providing evidence relevant to economic research. Professors Jacquemet and L'Haridon take the standard model in applied econometrics as a basis to the methodology of controlled experiments. Methodological discussions are illustrated with standard experimental results. This book provides future experimental practitioners with the means to construct experiments that fit their research question, and new comers with an understanding of the strengths and weaknesses of controlled experiments. Graduate students and academic researchers working in the field of experimental economics will be able to learn how to undertake, understand and criticise empirical research based on lab experiments, and refer to specific experiments, results or designs completed with case study applications.
