This concise handbook helps educators write for the rhetorical situations they will face as students of education, and as preservice and practicing teachers. It provides clear and helpful advice for responding to the varying contexts, audiences, and purposes that arise in four written categories in education: classroom, research, credential, and stakeholder writing. The book moves from academic to professional writing and chapters include a discussion of relevant genres, mentor texts with salient features identified, visual aids, and

The curriculum is flexible, user friendly, engaging, and purposefully built to prepare students for career, college, and life. In Module 3 of Grade 11, students engage in an inquiry-based, iterative process for research. Building on work with evidence-based analysis in Modules 1 and 2 of Grade 11, students explore topics that have multiple positions and perspectives by gathering and analyzing research based on vetted sources to establish a position of their own. Students first generate a written evidence-based perspective, which will serve as the early foundation of what will ultimately become a written research-based argument paper. The research-based argument paper synthesizes and articulates several claims using valid reasoning and relevant and sufficient evidence to support the claims.

Students read and analyze sources to surface potential problem-based questions for research, and develop and strengthen their writing by revising and editing.
