Including Infant Formulas, Calf Milk Replacers, Soy Creamers, Soy Shakes, Soy Smoothies, Almond Milk, Coconut Milk, Peanut Milk, Rice Milk, Sesame Milk, etc. John Wiley & Sons

Malawi is among the few countries in sub-Saharan Africa that has witnessed significant improvements in relation to meeting the Millennium Development Goal (MDG) targets. It exhibits some of the main challenges facing African democracies while they attempt to consolidate the benefits of democratisation. *Political Transition and Inclusive Development in Malawi* critically analyses opportunities and constraints related to the impact of democracy on development in one of the world's poorest countries. The book explores how, and to what extent, processes related to democratic and economic governance can be strengthened in order to make political and administrative authorities more responsive to development needs. It also considers characteristics of successful implementation of public policy and

the effective and timely delivery of basic services in local contexts; increased citizen participation and dialogue with local government authorities; factors that enable civil society organisations to hold political and administrative officials to account; and better utilisation of academic research for improved evidence-based policy formulation and implementation. This volume will be of great interest to scholars in development studies, African studies, politics, law and anthropology, as well as policymakers and those interested in democracy, governance, human rights and the implementation of anti-poverty programmes, development administration and decentralisation.

Posthuman Life CRC Press  
This book provides a commentary on the law of the EU related to the Monetary Union. It contains a comprehensive analysis of all provisions of the Statute of

---

the European System of Central Banks (ESCB) and the European Central Bank (ECB). In addition, the book also analyses all provisions of the Treaties themselves which regulate the ESCB and the ECB. This analysis is supplemented by commentaries on other Protocols which contain relevant rules for the Monetary Union. In essence, all relevant statutory rules governing the euro and its key monetary authority, the European Central Bank, are unfolded and explained in one volume. This gives the book a unique position in the legal literature on the law of the EU. With contributions by renowned academics and practitioners, this book is an expanded and updated translation of the 2013 German commentary, EWU Kommentar zu Europäischen Währungsunion (Mohr Siebeck) and is an invaluable resource for practitioners and academics alike who are looking for a provision-by-provision commentary on the laws governing the European Monetary Union.

**International Monetary Fund**

The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a

---

favourable light, even if the latter ' s aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland.

Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe ' s peripheral countries. Through a systematic analysis of Ireland ' s main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more

progressive responses to the crisis.

### **Inside the Enemy's Computer** Therapeutic Risk Management of Medicines

The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the de-legitimation of international institutions and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or, does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic

---

vigour of conventional concepts? These questions are the starting points for this book covering conceptualisations from rationalist to reflectivist, and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multi-polarity, spheres of influence, sovereignty, or even containment, are still cognitively valid, yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple, conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

The South China Sea  
Routledge

Compliance is a fundamental control  
function within regulated industries  
globally. This book provides an  
expert introduction to corporate

---

compliance using cases, examples and insights from the financial services sector and beyond. The author, an experienced compliance practitioner and academic, highlights compliance challenges, using examples such as Wells Fargo, whistleblowing in the financial services and the mis-selling of payment protection insurance in the UK banking sector. The book explores strategies for creating compliant cultures and fostering regulatory trust, whilst practical guidance is provided on anticipating regulatory changes. Addressing organisational obstruction and delay, the author presents a series of valuable tools and techniques for real-world practice. An essential professional development resource for board directors, compliance officers and other senior managers, the book also provides a unique learning and development resource for students of corporate compliance globally.

[Green Industrial Policy in Emerging Countries](#) Routledge

This book presents state-of-the-art theories and technologies and discusses developments in the two major fields: engineering and sustainable computing. In this modern era of information and communication technologies [ICT], there is a growing need for new sustainable and energy-efficient communication and

---

networking technologies. The book highlights significant current and potential international research relating to theoretical and practical methods toward developing sustainable communication and networking technologies. In particular, it focuses on emerging technologies such as wireless communications, mobile networks, Internet of things [IoT], sustainability, and edge network models. The contributions cover a number of key research issues in software-defined networks, blockchain technologies, big data, edge/fog computing, computer vision, sentiment analysis, cryptography, energy-efficient systems, and cognitive platforms. Identifying Cyber Attackers Taylor & Francis

Under the auspices of the Max Planck Institute for Intellectual Property and

Competition Law (now the Max Planck Institute for Innovation and Competition). And Institutum Iurisprudentiae, Academia Sinica, a group of twenty scholars from around the world gathered to study the experiences made with regards to compulsory licensing. The results are demonstrated in this book. Different articles analyze how the international conventions on intellectual property may be interpreted and explore the related doctrinal groundwork surrounding compulsory patent licensing and beyond. It is shown how the compulsory licensing regime could be transformed into a truly workable mechanism facilitating the speedy use and dissemination of innovation and

---

other subject matters of protection.  
How People, Money, and Ideas from  
China Are Changing a Region

Routledge

For decades, governments have tried to foster industrial competitiveness and economic growth. Many instruments are known to work, and many lessons have been learned. However, humanity is increasingly feeling the effects of natural resource depletion. The rate of this depletion is deeply unsustainable, and it is – as of yet – inextricably linked to economic growth and development. To preserve acceptable living conditions for future generations,

while at the same time creating these conditions for millions of poor in the first place, we must achieve a de-linking of economic activity and resource depletion. This book identifies the drivers and success factors of green industrial policy, which seeks to reconcile the synergies and trade-offs which exist between economic and environmental goals. Greening the economy is a goal which will require enormous investment. As markets are currently failing to provide the required incentives for environmental sustainability, governments must intervene and provide ‘ policy rents ’ for

---

investments in sustainability while withdrawing rents from polluting investments. In this they will face the risk of political capture by interest groups and difficult choices among technologies. Rent management is therefore the heart of green industrial policy and the focus of this book. On top of this, the country examples provided in this volume focus on the emerging powers, which will have an important influence the future of our planet. However, the lessons learned are valuable not only for countries introducing green industrial policies for the first time, but also for those under pressure to

reform existing policies. This book will be of interest to students, researchers and policymakers in the areas of energy policy, sustainable development, industrial economics and ecological economics.

The Other '68ers Bloomsbury Publishing Lure of the Big Screen explores film exhibition and consumption in rural parts of the UK and Australia, where film theatres are often highly valued as spaces around which isolated communities can gather and interact. Going beyond national borders, this book examines how theatres in areas of social and economic decline are sustained by resourceful individuals and sub-commercial operating structures. Systematic analysis of cinemas in non-metropolitan locations has yielded an original five-tiered clustering model

---

through which Karina Aveyard recognizes a range of types between large commercial multiplexes in stable regional centres and their smallest improvised counterparts in remote settlements. The democratic dividend Routledge This book is based on the author's experience of working for more than two decades in over thirty conflict and post-conflict zones. It is written for those involved in UN peacekeeping and the protection of civilians. It is intended to be accessible to non-lawyers working in the field who may need to know the applicable legal standards relating to issues such as the use of force and arrest and detention powers on the one hand and the delivery of life-saving assistance according to humanitarian principles on the other. It will also be of interest to scholars and students of peacekeeping, international

law and international relations on the practical dilemmas facing those trying to operationalise the various conceptions of 'protection' during humanitarian crises in recent years.

### Therapeutic Risk Management of Medicines Verso Books

In recent years, European societies and territories have witnessed the spatial impacts of a severe financial and socio-economic crisis. This book builds on the current debate concerning how cities and urban regions and their citizens deal with the consequences of the recent financial and socio-economic crisis. Cities in Crisis examines the political and administrative implications of austerity measures

---

applied in southern European cities. These include cuts in local public spending and the processes of privatization of local public assets, as well as issues related to the re-scaling, recentralization or decentralization of competencies. Attention is paid to the rise of new 'austerity regimes', the question of their legitimacy and their spatial manifestations, and in particular to the social consequences of austerity. The contributions to this book lay the foundation for recommendations on how to improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes. Such recommendations are applicable to cities and urban regions both within and outside of Europe. It identifies possible approaches, tools and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges.

Lessons from Haiti, 1994-2016 Intellect Books  
Hillary Rodham Clinton was the first Secretary of State to declare the subjugation of women worldwide a serious threat to U.S. national security. Known as the Hillary Doctrine, her stance was the impetus behind the 2010 Quadrennial Diplomatic and Development Review of U.S. foreign policy, formally committing America to the proposition that the empowerment of women is a

---

stabilizing force for domestic and international peace. Blending history, fieldwork, theory, and policy analysis while incorporating perspectives from officials and activists on the front lines of implementation, this book is the first to thoroughly investigate the Hillary Doctrine in principle and practice. Does the insecurity of women make nations less secure? How has the doctrine changed the foreign policy of the United States and altered its relationship with other countries such as China and Saudi Arabia? With studies focusing on Guatemala, Afghanistan, and Yemen, this invaluable policy text closes the gap between rhetoric and reality, confronting head-on what the future of fighting such an entrenched enemy entails. The research reports directly on the work being done by U.S. government agencies, including the

Office of Global Women's Issues, established by Clinton during her tenure at the State Department, and explores the complexity and pitfalls of attempting to improve the lives of women while safeguarding the national interest. Sustainable Communication Networks and Application Bloomsbury Publishing This book shows how one of the most powerful tools of security studies—strategic culture—illuminates the origins and implications of the Asia-Pacific region ' s difficult issues, from the rise of China and the American pivot, to the shifting calculations of many other actors. Strategic culture sometimes challenges and always enriches prevailing neo-realist presumptions about the region. It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between

---

neoclassical realist and constructivist approaches. The case studies in this book survey the role of strategic culture in the behaviors of Australia, China, Japan, the Philippines, South Korea and the United States. They show the contrast between structural expectations and cultural predispositions, as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political-military cultures to influence security policies. The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies, as well as how culture may impact the potential for future conflict or cooperation in the region. The result is a body of work that helps deepen our understanding of strategic cultures in the Asia-Pacific in comparative

perspective and enrich security studies. This book was published as a special issue of Contemporary Security Policy.

Sustainable Development and Planning VII Elsevier

Revised edition of Transportation planning handbook, 2009.

Tools, Techniques and Challenges in Financial Services Oxford University Press

This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais, Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the

---

exchange of information by experts undertaking and applying marine structural research. The aim of *Ships and Offshore Structures XIX* Routledge

Energy is becoming a prominent driver of economic development. Each year, billions of dollars are invested around the world by the public and private sectors in low-emissions energy development and energy efficiency planning. Energy-based economic development (EBED) is a domain that seizes the opportunities inherent in clean energy development to drive innovation and generate economic growth. Energy-based economic development: How clean energy can drive development and stimulate

economic growth delivers working definitions, common approaches, descriptions of supportive policy mechanisms, and suggested metrics for evaluation. The book offers a unified framework for EBED that is supported by examples and leaves readers better equipped to design, plan, and implement EBED initiatives. Case studies illustrate how national and subnational initiatives adopt to a locale 's energy asset base, energy and economic development needs, and the context in which the initiative operates. Descriptions of the energy projects supported by the American Recovery and Reinvestment Act offer insights about what worked and what did not and suggest ways in which

---

governments can be better prepared to manage EBED projects in the future.

This book provides the tools necessary to work toward simultaneous energy and economic development goals and facilitates discussion for an advanced policy agenda of energy efficiency, energy diversification, innovation-led economic growth, and job creation.

A Commentary on the Legal Foundations Oxford University Press

We imagine posthumans as humans made superhumanly intelligent or resilient by future advances in nanotechnology, biotechnology, information technology and cognitive science. Many argue that these enhanced people might live better lives; others fear that tinkering with

our nature will undermine our sense of our own humanity. Whoever is right, it is assumed that our technological successor will be an upgraded or degraded version of us: Human 2.0.

Posthuman Life argues that the enhancement debate projects a human face onto an empty screen. We do not know what will happen and, not being posthuman, cannot anticipate how posthumans will assess the world. If a posthuman future will not necessarily be informed by our kind of subjectivity or morality the limits of our current knowledge must inform any ethical or political assessment of that future. Posthuman Life develops a critical metaphysics of posthuman succession and argues that only a truly speculative

---

posthumanism can support an ethics that meets the challenge of the transformative potential of technology. Student Protest and Christian Democracy in West Germany Rowman & Littlefield From award-winning journalist Jack Shenker, *The Egyptians* is the essential book about Egypt and radical politics In early 2011, Cairo's Tahrir Square briefly commanded the attention of the world. Half a decade later, the international media has largely moved on from Egypt's explosive cycles of revolution and counter-revolution - but the Arab World's most populous nation remains as volatile as ever, its turmoil intimately bound up with forms of authoritarian power and grassroots resistance that stretch right across the globe. In *The Egyptians: A Radical Story*, Jack Shenker uncovers the roots of the uprising that succeeded in

toppling Hosni Mubarak, one of the Middle East's most entrenched dictators, and explores a country now divided between two irreconcilable political orders. Challenging conventional analyses that depict contemporary Egypt as a battle between Islamists and secular forces, *The Egyptians* illuminates other, far more important fault lines: the far-flung communities waging war against transnational corporations, the men and women fighting to subvert long-established gender norms, the workers dramatically seizing control of their own factories, and the cultural producers (novelists, graffiti artists and illicit bedroom DJs) appropriating public space in defiance of their repressive and increasingly violent western-backed regime. Situating the Egyptian revolution in its proper context - not as an isolated

---

event, but as an ongoing popular struggle against a certain model of state authority and economic exclusion that is replicated in different forms around the world - The Egyptians explains why the events of the past five years have proved so threatening to elites both inside Egypt and abroad. As Egypt's rulers seek to eliminate all forms of dissent, seeded within the rebellious politics of Egypt's young generation are big ideas about democracy, sovereignty, social justice and resistance that could yet change the world.

History of Soymilk and Other Non-Dairy Milks (1226-2013) Penguin UK

This book assesses the UN Peace Operations in Haiti and establishes what lessons should be taken into account for future operations elsewhere. Specifically, the book examines the UN 's approaches to security and stability, demobilisation,

disarmament and reintegration (DDR), police, justice and prison reform, democratisation, and transitional justice and their interdependencies through the seven UN missions in Haiti. Drawing on extensive fieldwork and interviews conducted in Haiti, it identifies strengths and weaknesses of these approaches and focuses on the connections between these different sectors. It places these efforts in the broader Haitian political context, emphasises economic development as a central factor to sustainability, provides a civil society perspective, and discusses the many constraints the UN faced in implementing its mandates. The book also serves as a historical account of UN involvement in Haiti, which comes at a time when the drawdown of the mission has begun. In an environment where the UN is increasingly seeking to conduct

---

security sector reform (SSR) within the context of integrated missions, this book will be a valuable contribution to the debate on intervention, UN peace operations and SSR. This book will be of interest to students of peace operations and peacekeeping, conflict studies, security studies and IR in general.
