This book is a thorough treatise concerned with coherence and its significance in legal reasoning. The individual

chapters present the topic from the general philosophical perspective, the perspective of legal-theory as well as the viewpoint of cognitive sciences and the research on artificial intelligence and law. As it has turned out the interchange of knowledge among these disciplines is very fruitful for each of them, providing mutual inspiration and increasing

understanding of a given topic. This book is a unique resource for anyone interested in the concept of coherence and the role it plays in reasoning. As this book captures important contemporary issues concerning the ongoing discussion on coherence and law, those interested in legal reasoning should find it particularly helpful. By presenting such a broad scope of views and methods on approaching the issue of coherence we hope to promote the general interest in the topic as well as the academic research that centers around coherence and law.

Coherence: Insights from Philosophy, Jurisprudence and Artificial Intelligence

Make every student fluent in the language of learning. The Common Core and

ELD standards provide pathways to academic success through academic language. Using an integrated Curricular Framework, districts, schools and professional learning communities can:

- Design and implement thematic units for learning
- Draw from content and language standards to set targets for all students
- Examine standards-centered materials for academic language
- Collaborate in planning instruction and assessment within and across lessons
- Consider linguistic and cultural resources of the students
- Create differentiated content and language objectives
- Delve deeply into instructional strategies involving academic language
- Reflect on teaching and learning

Integrate interactive whiteboard technology into your instruction and engage your students with fun activities that are designed using Promethean ActivInspire software and perfect for touch-screen technology! Designed to support existing content-area lessons with standards-based, interactive activities, this resource is teacher-friendly, based on research, and easy to use. The 128-page book includes 30 easy-to-follow activities and a ZIP file with templates and examples. This resource is correlated to the Common Core State Standards, is aligned to the interdisciplinary themes from the

Partnership for 21st Century Skills, and supports core concepts of STEM instruction. 128pp. *Strategies for Developing Higher-Order Thinking Skills Levels 3-5* Greenwood Publishing Group
The book presents a remarkable collection of chapters covering a wide range of topics in the areas of intelligent systems and artificial intelligence, and their real-world applications. It gathers the proceedings of the Intelligent Systems Conference 2019, which attracted a total of 546 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process, after which 190 were selected for inclusion in these proceedings. As intelligent systems continue to replace and

sometimes outperform human intelligence in decision-making processes, they have made it possible to tackle a host of problems more effectively. This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for an international conference as a venue for reporting on the latest innovations and trends. This book collects both theory and application based chapters on virtually all aspects of artificial intelligence; presenting state-of-the-art intelligent methods and techniques for solving real-world problems, along with a vision for future research, it represents a unique and valuable asset.

This book summarizes
the works and new

research results presented at the First International Symposium on Intelligent Interactive Multimedia Systems and Services (KES-IIMSS 2008), organized by the University of Piraeus and its Department of Informatics in conjunction with KES International (Piraeus, Greece, July 9–11, 2008). The aim of the symposium was to provide an internationally respected forum for scientific research into the technologies and applications of intelligent interactive multimedia systems and services. Besides the Preface, the book contains sixty four (64) chapters. The first four (4) chapters in the book are printed versions of the

keynote addresses of the invited speakers of KES-IIMSS 2008. Besides the invited speaker chapters, the book contains fifteen (15) chapters on recent Advances in Multimedia Data Analysis, eleven (11) chapters on Reasoning Approaches, nine (9) chapters on Infrastructure of Intelligent Interactive Multimedia Systems and Services, fourteen (14) chapters on Multimedia Applications, and eleven (11) chapters on Quality of Interactive Multimedia Services. *Census Tract Papers* Springer Science & Business Media This best-selling textbook offers a sound and practical introduction to the skills needed to gain Qualified Teacher

performance

indicators. It also

outlines a process

that combines both

numerical indicators with the classical result of massive questionnaires successfully incorporating both the quantitative and qualitative aspects of maintenance performance. In addition, the author provides examples of MPM frameworks that are used in organizations with condition-based, vibration-based, and reliability-centered maintenance. A useful handbook for students and maintenance professionals, this book provides readers with an understanding of how to Align the organizational strategy to the strategies of the maintenance function Link the maintenance performance measures to the different hierarchies of the organization and establish effective communication between them Translate the MPIs at operational level to the corporate level (to create value for the whole organization and its customers) Identify the weaknesses and strengths of the implemented maintenance strategy Maintenance Audits Handbook: A Performance Measurement Framework provides readers with a sound foundation for developing and measuring a comprehensive maintenance improvement strategy using qualitative and

The three-volume set CCIS 1419, CCIS 1420, and CCIS 1421 contains the extended abstracts of the posters presented during the 23rd International Conference on Human-Computer Interaction, HCII 2021, which was held virtually in July 2021. HCII 2021 received a total of 6326 submissions, of which 1439 papers and 238 posters were accepted for publication in the pre-

conference proceedings after a careful reviewing process. The 238 poster papers presented in these three volumes are organized in topical sections as follows:

Part I: HCI theory and methods; perceptual, cognitive and psychophysiological aspects of interaction; designing for children; designing for older people; design case studies; dimensions of user experience; information, language, culture and media.

Part II: interaction methods and techniques; eye-tracking and facial expressions recognition; human-robot interaction; virtual, augmented and mixed reality; and privacy issues in HCI; AI and machine learning in HCI. Part

III: interacting and learning; interacting and playing; interacting and driving; digital wellbeing, eHealth and mHealth; interacting and shopping; HCI, safety and sustainability; HCI in the time of pandemic. offers a fresh approach for applying functional linguistics to assess student performance, to inform the teaching and learning of Chinese and to design curriculum and teaching materials. Documenting authentic systemic functional linguistics (SFL) studies in researching and teaching Chinese as a first or second language, this research is set in the multilingual settings of Hong Kong and Australia. The experiences of SFL and genre teaching in English have been well demonstrated as valid, viable and practical in different contexts; however this volume covers the relatively new domain of research into the applications of SFL to the teaching of Chinese. Using SFL as the research framework, the authors cover three major areas in Chinese language education: effective pedagogies, curriculum and material design, and text analysis. Covering major local curriculum reforms and the rapid growth of

International Baccalaureate programmes worldwide, this book will be of interest to linguists, language teachers and teacher educators and those involved in the teaching and learning of Chinese around the world.
