In this 2012 edition of *Advances in Knowledge-Based and Intelligent Information and Engineering Systems* the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world. The 228 papers that are included cover a wide range of topics. One emphasis is on Information Processing, which has become a pervasive phenomenon in our civilization. While the majority of Information Processing is becoming intelligent in a very broad sense, major research in Semantics, Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living. Ontologies play a major role in the development of Knowledge Engineering in various domains, from Semantic Web down to the design of specific Decision Support Systems. Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here. Other subjects in this volume are modern Machine Learning, Lattice Computing and Mathematical Morphology. The wide scope and high

quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans.

This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

Y.I.T.B.: It means Yours In The Bonds. It was how they signed their letters and their emails to each other. They were The Brothers of Zeta Chi, and they vowed decades earlier that their pledge meant more than having drinking buddies for life. It was their thirtieth reunion at John Adams College and they 'd come in from all over to attend. Harry was there, but his old roommate Hutch never made it, but he had a good reason. Hutch was dead, found locked in his car. Was it suicide, or an accident, or due to natural causes? None of the explanations were satisfactory, and when the authorities refused to investigate due to lack of evidence indicating foul play, the brothers said, "If you won't investigate, we will." Who knew it would lead Harry and The Brothers into a showdown involving international terrorists, the police, the CIA, and the Financial Crimes and Enforcement Network inside the U.S. Treasury called FinCEN.

BMW is a company associated with motoring firsts. The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972. As BMW 's " middle child, " the 5 series has drawn features from the company 's smallest and largest models, establishing a reputation for performance and practicality through multiple generations. This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60 's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the time of and reasons for their introduction. Several aspects of BMW 's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. The book includes more than 200 photographs.
