Research into the history of Christian missions in the context of colonialism has focused primarily on missions as institutions and on the ways in which people were integrated into the economic, political and ideological spheres of imperial powers. Reduced to an experience occurring within a person, faith was deemed unapproachable by scientific methods. This has, in effect, constituted a silence regarding the everyday experience of religiosity amongst those drawn to Christianity. Ethnography of Faith is a detailed study of the ways in which people engage with and experience the religious in order to recognise and understand this suppressed voice of religiosity. In her analysis of the Lutheran church in the Soutpansberg of early twentieth century South Africa, Caroline Jeannerat listens closely to how people describe their own faith and that of others in the archive: in accounts of work done, in texts written for mission publications, in songs composed for church services, in letters and newspaper articles and in oral memories. A careful reading of this archive for breaks, for misunderstandings and oppositions, for sentiments of agreement, praise, compatibility and claims of shared experiences identifies negotiations of meaning which give indications of conceptualisations of faith that stand in distinction to those of the missionaries and their expectations. Caroline Jeannerat holds a PhD in history and anthropology from the University of Michigan (2007).

Since the invention of automobiles, there were sporty cars and there were practical cars. BMW engineers dared to design a car with features of both. In doing so, they created one of the classic cars of all time, the 3-Series. For over 40 years, this model has given its owner the joy of everyday driving. The commute to work suddenly was as much fun as track day. Follow the story of this category-creating car from the origins of its maker as a World War I airplane engine manufacturer until the hugely successful car it is today. This is the first of three books about the history of the 3-Series. It tells the tale of a failing German car company unable to find its way after World War II. A last-minute loan gave BMW one last chance. The company used that opportunity to create the Neue Klasse generation of cars in which we find the genetic origins of the 3-Series. In the 1970s, the world was reacting to a severe oil-shortage. Introduced just at this right time was the practical but sporty first generation of 3-Series, the E21. With the introduction of the E30, the second generation of the 3-Series, BMW took the success of this two-door coupe and ran with it, creating sedans, wagons, all-wheel drive vehicles and the M3 supercar.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to

help us appreciate and understand our precariously balanced world.
