The early, spontaneous art of young artists with autism tells a story, a narrative described in the language of visual structure and forms. Not only do these artists inform us of their world in their images, they tell us of our own visual possibilities and meaning-making capacities, too.

The kaleidoscope, the stereoscope, and other nineteenth-century optical toys analyzed as “ new media ” of their era, provoking anxieties similar to our own about children and screens. In the nineteenth century, the kaleidoscope, the thaumatrope, the zoetrope, the stereoscope, and other optical toys were standard accessories of a middle-class childhood, used

both at home and at school. In *Playful Visions*, Meredith Bak argues that the optical toys of the nineteenth century were the “ new media ” of their era, teaching children to be discerning consumers of media—and also provoking anxieties similar to contemporary worries about children's screen time. Bak shows that optical toys—which produced visual effects ranging from a moving image to the illusion of depth—established and reinforced a new understanding of vision as an interpretive process. At the same time, the expansion of the middle class as well as education and labor reforms contributed to a new notion of childhood as a time of innocence and play. Modern media culture and the emergence of modern Western childhood are thus deeply interconnected. Drawing on extensive archival research, Bak discusses, among other things, the circulation of optical toys, and the wide visibility gained by their appearance as printed templates and textual descriptions in periodicals; expanding

conceptions of literacy, which came to include visual acuity; and how optical play allowed children to exercise a sense of visual mastery. She examines optical toys alongside related visual technologies including chromolithography—which inspired both chromatic delight and chromophobia. Finally, considering the contemporary use of optical toys in advertising, education, and art, Bak analyzes the endurance of nineteenth-century visual paradigms.

In Hands-On Science

Mysteries for Grades 3-6, the authors connect science to real-

world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship Mary Celeste, and the “ Dancing Stones ” of Death Valley. The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.

Routledge

Review of 1st edition "I found the whole account a model of clarity with a good blend of theory and practice which many authors would do well to note" Ted Wragg, TES The First Years at School (2nd Edn) is a practical and reflective discussion of the education

of 4 to 8 year olds based on a sympathetic recognition of the complexities of being an early years teacher. Angela Anning begins by reviewing the historical and ideological traditions of British infant and primary schools, tracing how we have reached the position where teachers feel themselves to be torn between child-centered and utilitarian demands in educating young children. She then provides a detailed and authoritative critique of recent thinking about the cognitive, social and emotional development of children, and explores the complexities of teachers' roles. She discusses the organization of the classroom, the structuring of learning in the school day and the content of the curriculum. She tackles the implications of the series of

changes in the National Curriculum Orders and the national assessment systems for seven year olds and their impact on pre-fives and children with special educational needs. The second edition brings the debate about the post Dearing Key Stage One curriculum and its implications for pre-school education bang up to date. This will be vital reading for both student and practising teachers of young children. Gannetteer Nelson Thornes

Some of the highest-quality art markers on the market, Copic markers continue to grow in popularity for paper crafters, and this informative and instructional book assists crafters of all levels in mastering Copic coloring skills. In addition to an explanation of the color-coding system, suggestions for compatible inks and papers to use, and step-by-step tutorials on the most popular coloring techniques, this go-to

Writing situation comedies isn ' t really that hard. So much of what you need to know is already defined for you. You know that your script needs to be a certain short length, with a certain small number of characters. You know that your choice of scenes is limited to your show ' s standing sets and maybe one or two swing sets or outside locations. You know how your characters behave and how they ' re funny, either because you invented them or because you ' re writing for a show where these things are already well established. Sitcom is easy and sitcom is fun. Sitcom is the

gateway drug to longer forms of writing. It ' s a pretty good buzz and a pretty good ride, a great way to kill an afternoon, or even six months. And now, thanks to comedy writing guru John Vorhaus (author of **THE COMIC TOOLBOX: HOW TO BE FUNNY EVEN IF YOU'RE NOT**), writing situation comedy is easier than ever. In **THE LITTLE BOOK OF SITCOM**, you'll find a whole trove of tools, tricks and problem-solving techniques that you can use -- now, today -- to be the sitcom writer of your wildest dreams. Ready to write? Ready to have fun? **THE LITTLE BOOK OF SITCOM** is the big little book for you.

The Stories We Draw Oswaal Books and Learning Private Limited

Issues in Art and Design

Teaching draws together a range of pedagogical and ethical issues for trainee and newly qualified teachers of art and design, and their mentors in art and design education. Arguing for a critical approach to the art and design curriculum, the collection encourages students and teachers to consider and reflect on issues in order that they can make reasoned and informed judgments about their teaching of art and design. Among the key issues addressed include: challenging orthodoxies and exploring contemporary practices measuring artistic performance art history and multicultural education research in art and design education transitions in art and design education: primary/secondary and secondary/tertiary the role of art and design in citizenship

education.
