A study group examined options and implications in simplifying the financial aid process. It focused on: (1) identifying ways to shorten the FAFSA and make it less burdensome to complete; (2) identifying changes to the statutory need analysis formula that would reduce the amount of financial info. required by the FAFSA without causing redist. of fed. and state student aid; and (3) determining how any changes to the FAFSA and the statutory need analysis formula could be implemented. This summary captures the ideas and themes that emerged at the panel and during interviews. **Federal Student Aid Princeton Review**

Since its launch in 2006, the Hamilton Project at Brookings has produced extensive research on how to create a growing economy that benefits all Americans. Its pragmatic work aims to increase opportunities for broad-based wealth, economic security, and enduring growth. *Path to Prosperity*, the first book to emerge from the Hamilton Project, presents important and original work to that end. *Path to Prosperity* focuses on three key criteria for fostering broadly shared economic growth: enhancing economic security, building a highly skilled work force, and reforming the tax system. Income security proposals offer methods for reforming unemployment insurance, protecting against the risk of reemployment at a lower wage after job loss, and improving incentives for retirement saving. Education proposals build human capital by improving each level of education, from preschool programs for poor children to graduate fellowships in math and science. The tax proposals seek to make taxation simpler, more progressive, and better suited to a global economy. Contributors include Roger C. Altman, Reuven S. Avi-Yonah, Jason E. Bordoff, Kimberly A.
