" FUN " Standard-Based Activities to Boost the Math Skills of Struggling and Reluctant Learners Saddleback Educational Publ

"What can trainers learn from ""Sesame Street""? Apparently quite a lot. Like how to make trainees turn on--not tune out--to learning by injecting training sessions with energy and excitement. Trainers in Motion is a lively new book that offers a training approach inspired by the success of ""Sesame Street"" and other children's educational programming. Centered around the idea of ""edutainment"" (which says people learn better by doing), this book emphasizes interactive learning and shows readers how to: * Apply the principles of edutainment to workshops for adults * Create a stimulating learning environment * Engage the imagination and creative side of trainees * Make the training experience more exciting, involving, and productive for both learner and trainer. Perhaps best of all, the training techniques in Trainers in Motion work in any training environment, with any topic, and with any type of person."

Today's ever-evolving workplace requires managers to hone new skills so they can make informed decisions, manage diverse teams, and lead change. Management Today: Best Practices for the Modern Workplace cuts through the noise by introducing students to evidence-based management theories, models, and strategies. Experiential activities, critical thinking questions, and self-assessments provide students with hands-on opportunities to practice essential management skills.

Authors Terri A. Scandura and Kim Gower provide best practices and explore timely issues like emotional intelligence, cultural intelligence, and virtual teams. Real-world cases explore good and bad examples of management, including the college admissions scandal, Theranos, and Walmart. In-depth coverage of big data, data analytics, and technology ensures students are ready to thrive in today's workplace.

Early Childhood Education in Nigeria Carson-Dellosa Publishing

This is the first in-depth look at the important connections between the arts and science specifically for early childhood education (pre-K – 3rd grade). Highlighting their many commonalities, such as the processes involved in creative problem solving, the author draws on what we can learn from Leonardo da Vinci as the supreme artist-scientist. Every chapter begins with a vignette of Leonardo and relates his thinking to the development of children's ideas in the arts and STEM (STEAM). This fresh look at the interdisciplinary connections of the arts and science offers early childhood teachers and administrators a spectrum of tools for connecting the creative arts (art, movement, drama, and music) to the STEM movement, 21st-century skills, and developmentally appropriate practice. "A coherent, well-researched argument for replacing meaningless activities with engaging creative art and STEM experiences." —From the Foreword by Judy Harris Helm, president, Best Practices, Inc. "Mary Jo understands the many connections between science and art, and her materials and resources foster creativity and science learning with ready-to-use activities." —Carrie Lynne Draper, founder & executive director, Readiness Learning Associates "Woven throughout the book are historical perspectives, current research, critical concepts, and activity ideas that provide a rich rationale and immediate applicability to the classroom." —Julie Bullard, University of Montana

Hands-on Activities, Easy-to-use Manipulatives, Lessons & Objectives Included Carson-Dellosa Publishing
