The Soviet Space Shuttle Department of the Army Much has been written in the West on the history of the Soviet space program but few Westerners have read direct first-hand accounts of the men and women who were behind

the many Russian accomplishments in exploring space. The memoirs of Academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Twenty-seven years later, he became deputy to the founding figure of the Soviet space program, the mysterious "Chief Designer" Sergey Korolev. Chertok's sixtyyear-long career and the

many successes and failures of the Soviet space program constitute the core of his memoirs. Rockets and People. In these writings, spread over four volumes. In Volume 1, Chertok describes his early years as an engineer and ends with the mission to

Germany after the end of World War II when the Soviets captured Nazi missile technology and expertise. Volume 2 takes up the story with the development of the world's project designed to beat first intercontinental ballistic missile (ICBM) of Sputnik and the early Moon probes. In Volume 3. Chertok recollects the great successes of the Soviet space program in the 1960s including the launch of the world's first space voyager Yuriy

Gagarin as well as many events connected with the Cold War. Finally, in Volume 4, Chertok meditates at length on the massive Soviet lunar the Americans to the Moon in the 1960s, ending with his remembrances of the Energiya-Buran project. NASA SP-2005-4110.
