In this lab, you will collect data about your roller coaster and marble as it travels along the track. You will then organize this data and use it make conclusions about your roller coaster. These instructions are a class set, so you will need to develop a lab report on your own sheet of paper.

Paper Roller Coasters - Scientific American

Your lab results are to be turned in via Google Docs. Check your Google Apps account for a shared document called, "Paper Coaster Lab Data." Background: An object will travel in a straight line until a force acts to change its path of motion. This means that to travel in a circle (or a loop) the force must act on an object to push it sideways. When the force acts to push the ball to the inside ...

Paper Roller Coasters Objective: Work in groups of 2 or 3 utilizing your knowledge of Newton ' s 3 Laws of Motion to create a paper roller coaster that can carry a marble for the longest period of time without stopping.

The Great Paper Roller Coaster Challenge

In the case of a marble on a paper roller coaster, a marble starts at the top of the roller coaster with a relatively large amount of potential energy and no kinetic energy. As the marble starts rolling down the roller coaster, the amount of potential energy stored in the marble decreases while its kinetic energy increases.
