The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about

how one learns and how to teach, in some countries of the “developed world,” there is still there is a high rate of school failure.

Although the term “school failure” is a very complex construct, insofar as its causes, consequences, and development, from the field of educational psychology, the construct “student engagement” has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the students’ involvement in school and describes their feelings, behaviors, and thoughts about their school experiences. So, engagement is an important component of students’ school experience, with a close relationship to achievement and school failure. Children who self-set academic goals, attend school regularly and on time, behave well in class, complete their homework, and study at home are likely to interact adequately with the school social and physical environments and perform well in school. In contrast,

children who miss school are more likely to display disruptive behaviors in class, miss homework frequently, exhibit violent behaviors on the playground, fail subjects, be retained and, if the behaviors persist, quit school. Moreover, engagement should also be considered as an important school outcome, eliciting more or less supportive reactions from educators. For example, children who display school-engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true. But what makes student engage more or less? The relevant literature indicates that personal variables (e.g., sensory, motor, neurodevelopmental, cognitive, motivational, emotional, behavior problems, learning difficulties, addictions), social and/or cultural variables (e.g., negative family conditions, child abuse, cultural deprivation, ethnic conditions, immigration), or school variables (e.g., coexistence at school,

bullying, cyberbullying) may concurrently hinder engagement, preventing the student from acquiring the learnings in the same conditions as the rest of the classmates.

*Mathematical Literacy, Grade 11* Creston Books  
Racial intolerance, social change, and sweeping progress make 1908 Washington, D.C., a turbulent place to grow up in for 12-year-old Emily Soper. For Emily, life in Papa's carriage barn is magic, and she's more at home hearing the symphony of the blacksmith's hammer than trying to conform to the proper expectations of young ladies. When Papa's livelihood is threatened by racist neighbors and horsepower of a different sort, Emily faces changes she'd never imagined. Finding courage and resolve she didn't know she had, Emily strives to save Papa's business, even if it means going all the way to the White House.

SHORTLISTED for the 2011 Man Booker Prize for Fiction A thrilling and powerful novel about a young boy lured to sea by the promise of adventure and reward, with echoes of Great Expectations, Moby-Dick, and The Voyage of the Narwhal. Jamrach's Menagerie tells the story of a nineteenth-century street

urchin named Jaffy Brown. Following an incident with an escaped tiger, Jaffy goes to work for Mr. Charles Jamrach, the famed importer of exotic animals, alongside Tim, a good but sometimes spitefully competitive boy. Thus begins a long, close friendship fraught with ambiguity and rivalry. Mr. Jamrach recruits the two boys to capture a fabled dragon during the course of a three-year whaling expedition. Onboard, Jaffy and Tim enjoy the rough brotherhood of sailors and the brutal art of whale hunting. They even succeed in catching the reptilian beast. But when the ship's whaling venture falls short of expectations, the crew begins to regard the dragon—seething with feral power in its cage—as bad luck, a feeling that is cruelly reinforced when a violent storm sinks the ship. Drifting across an increasingly hallucinatory ocean, the survivors, including Jaffy and Tim, are forced to confront their own place in the animal kingdom. Masterfully told, wildly atmospheric, and thundering with tension, Jamrach's Menagerie is a truly haunting novel about friendship, sacrifice, and survival.

On Sunday April 27, 2003, 27-year old Aron Ralston set off for a day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then

head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: bracing the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappel to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling. Avichal Publishing
