Portuality is a concept that has long been rooted in several urban centers. It denotes a territorial quality specific to those cities and developed through strong relationships with their own port. Beyond the Port City recognizes portuality as a specific condition and suggests that the city-port threshold could emerge as one major symbolic field of exploration. This unique threshold materializes along the margin between the two authorities, namely in that space where the city and the port are side by side. It is marked by an administrative boundary that becomes an accumulator of transit: a fragmented space where the juxtapositions take sufficient shape to acquire a dimension and to be recognizable. This book updates the old city-port dichotomy and outlines a new vision in which the port city is a forma urbis affected by the speed of changing processes and influenced by the factors that are embodied in its territorial palimpsest.

Beyond the Port City John Wiley & Sons  
There is a vast literature on the principles of public administration and good governance, and no shortage of theoreticians, practitioners and donors eager to push for public sector reform, especially in less-developed countries. Papua New Guinea has had its share of public sector reforms, frequently under the influence of multinational agencies and aid donors. Yet there seems to be a general consensus, both within and outside Papua New Guinea, that policy making and implementation have fallen short of expectations, that there has been a failure to achieve 'good governance'. This volume, which brings together a number of Papua New Guinean and Australian-based scholars and practitioners with deep familiarity of policy making in Papua New Guinea, examines the record of policy making and implementation in Papua New Guinea since independence. It reviews the history of public sector reform in Papua New Guinea, and provides case studies of policy making and implementation in a number of areas, including the economy, agriculture, mineral development, health, education, lands, environment, forestry, decentralization, law and order, defence, women and foreign affairs, privatization, and AIDS. Policy is continuously evolving, but this study documents the processes of policy making and implementation over a number of years, with the hope that a better understanding of past

successes and failures will contribute to improved governance in the future.
