There's nothing more frustrating than watching your bright, talented son or daughter struggle with everyday tasks like finishing homework, putting away toys, or following instructions at school. Your "smart but scattered" 4- to 13-year-old might also have trouble coping with disappointment or managing anger. Drs. Peg Dawson and Richard Guare have great news: there's a lot you can do to help. The

latest research in child development shows that many kids who have the brain and heart to succeed lack or lag behind in crucial "executive skills"--the fundamental habits of mind required for getting organized, staying focused, and controlling impulses and emotions. Learn easy-to-follow steps to identify your child's strengths and weaknesses, use activities and techniques proven to boost specific skills, and problem-solve daily routines. Helpful worksheets and forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Small changes can add up to big improvements--this empowering book shows how. See also the authors' Smart but Scattered Teens and their self-help guide for adults. Plus, an academic planner for middle and high school students and related

Everyone agrees that what we do in schools should be based on what we know about how the brain learns. Until recently, however, we have had few clues to unlock the secrets of the brain. Now, research from the neurosciences has greatly improved our understanding of the learning process, and we have a much more solid foundation on which to base educational decisions. In this completely revised and

updated second edition, Patricia Wolfe clarifies how we can effectively match teaching practice with brain functioning. Encompassing the most recent and relevant research and knowledge, this edition also includes three entirely new chapters that examine brain development from birth through adolescence and identify the impact of exercise, sleep, nutrition, and technology on the brain. Brain Matters begins with a "mini-textbook" on brain anatomy and physiology, bringing the biology of the brain into context with teaching and learning. Wolfe describes how the brain encodes, manipulates, and stores information, and she proposes implications that recent research has for practice—why meaning is essential for attention, how emotion can enhance or impede learning, and how different types of rehearsal are necessary for

different types of learning.

Finally, Wolfe introduces and examines practical classroom applications and brain-compatible teaching strategies that take advantage of simulations, projects, problem-based learning, graphic organizers, music, active engagement, and mnemonics. These strategies are accompanied by actual classroom scenarios—spanning the content areas and grade levels from lower elementary to high school—that help teachers connect theory with practice.

Dimensions, Implications and Government Responses Speed of Creativity Learning Murder, mystery, and interstellar intrigue! Lassti, a newly discovered planet, is the center of political intrigue. Recently the planet survey team 's physicist was found dead. Was he killed? If so, by who? One of his fellow surveyors? Or by one of the birdlike natives of Lassti? This is, if they are intelligent at all, which is proving hard to tell.

Into this mix arrives Tocohl, a Hellspark trader who just wanted to have a vacation. After being attacked, rescuing a young woman, and going before a judge, Tocohl has learned all she ever wanted to know about being in the wrong place at the wrong time. Now she is seeking answers to mysteries that could save a world. Hellspark, in particular, is one of our very favorite novels in any genre. All of Janet 's excellencies are apparent as she explores the interfaces of culture, language, intelligence, and what it means to be human. If you have not read Hellspark, you must do so immediately. We need to play with media to become more effective communicators. This book was

written to inspire and empower you, as a creative person, to expand your personal senses of digital literacy and digital agency as a multimedia communicator. As you learn to play with digital text, images, audio and video, you will communicate more creatively and flexibly with a wider variety of options. Although written primarily for educators, anyone who is interested in learning more about digital communication will learn something new from this book. As children, we learn to progressively make sense of our confusing world through play.

The same dynamics apply to us as adults communicating with new and different media forms.
