For almost forty years, the verdict on Lyndon Johnson's presidency has been reduced to a handful of harsh words: tragedy, betrayal, lost opportunity. Initially, historians focused on the Vietnam War and how that conflict derailed liberalism, tarnished the nation's reputation, wasted lives, and eventually even led to Watergate. More recently, Johnson has been excoriated in more personal terms: as a player of political hardball, as the product of machine-style

corruption, as an opportunist, as a cruel husband and boss. In contempt. It is time to set the record straight. Woods's Johnson is a flawed but deeply sympathetic character. He was born into a family with a liberal Texas tradition of public service and a strong belief in the public good. He worked tirelessly, but not just for the sake of ambition. His approach to reform at home, and to fighting fascism and communism abroad, was motivated by the same ideals and based on a liberal Christian tradition that is often forgotten today. Vietnam turned into a tragedy, but it was part and parcel of Johnson's commitment to civil rights and antipoverty reforms. LBJ offers a fascinating new history of the political upheavals of the 1960s and a new way to understand the last great burst of liberalism in America. Johnson was a

This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history. Taken together, the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of

school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.

Curriculum Leadership by Middle Leaders focusses on major issues relating to the continuing national and international discourse on curriculum leadership, and highlights the vital role of middle leaders in schools. School leadership has focused primarily on first-order change involving school leaders or principals. This book seeks to put the spotlight on second-order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long-term change in teaching and learning that will influence what happens in classrooms. With timely and thought-provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings, the book is guided by several underlying questions: How

might we re-envision curriculum leadership so that it addresses both local and global concerns and aspirations? How might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives? How might middle leaders transform pressures into possibilities? This book will appeal to current teachers, those currently undertaking teacher training and students or academics carrying out research in the field of educational leadership. The relationship between the degree of wage indexation chosen by private agents and the degree of public debt indexation chosen by the government is examined. It is shown that the government is likely to increase public debt indexation in response to an increase in wage indexation. By contrast, higher public debt indexation has an ambiguous effect on wage indexation. In equilibrium, wage and public debt indexation may be positively or negatively related. This relationship is analyzed in situations where the policymakers can precommit to policies and in those they cannot.

founder—told through the words of Bin Laden and his closest circle Usama Bin Laden's greatest fear was not capture or death, but the exposure of al-Qaeda's secrets. At great risk to themselves and the entire mission, the U.S. Special Operations Forces, who carried out the Abbottabad raid that killed Bin Laden, took an additional eighteen minutes to collect Bin Laden's hard drives and thereby expose al-Qaeda's secrets. In this ground-breaking book, Nelly Lahoud dives into Bin Laden's files and meticulously distills the nearly 6,000 pages of Arabic private communications. For the first time, al-Qaeda's closely guarded secrets are laid bare, shattering misconceptions and revealing how and what Bin Laden

communicated with his associates, his plans for future attacks, and al-Qaeda's hostility toward countries such as Saudi Arabia, Iran, and Pakistan. Lahoud presents firsthand accounts of al-Qaeda from 9/11 until the elimination of Bin Laden, as told through his own words and those of his family and closest associates. Conference on the Research Use and Disposition of Senators' Papers International Monetary Fund This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought; the thread throughout Rost's book is that leadership was conceived of as good

management. He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways. The ethics of leadership from a postindustrial perspective completes the paradigm. The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership. **Dynamics of Leadership** Disha Publications Developing Leadership Skills A Source Book for Librarians Englewood, Colo. : Libraries Unlimited *Leadership of the New America* Simon and Schuster Collects the personal papers of Martin Luther King Jr. from January 1961 to August 1962, that sees King stop participating in Freedom Rides and his arrest in Albany. Despite the proven benefits of emotional intelligence, organizational life has typically been hostile to the inner world of feeling. Rationality is deemed superior to feeling, which can contaminate judgment. But without feeling there is no passion, and no action. This book sets out to change people and organizations for the better, by revealing the 'dark side' of leadership behaviour and its impact on performance. Tapping into the startling parallels between the journey to

emotional intelligence, the process of psychoanalysis, the practice of leadership coaching and the Zen journey to enlightenment, renowned thinker Manfred Kets de Vries helps executives, consultants, and coaches to peel back the layers of self-deception and reveal how inner personality – largely hard-wired since early childhood – affects the way they lead and manage others.
