In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker,

and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

Can Pacific nations, endowed with islands of travel poster beauty, vibrant cultures, and centuries old ways of life based on sustainable practices, hurdle significant development and political challenges they face today - in addition to withstanding climate change and rising sea levels? Corruption, reliance on donor-driven aid and consultants, dwindling rural populations and burgeoning urban centers that stress the ability of governments to provide education and health services, an epidemic of non-communicable diseases as lifestyles change, and battles with countries outside the region for control of fisheries and deep sea resources - these are among the increasingly challenging issues facing the islands today. In a series of essays about the looming climate threat, sustainable development and the region's multi-billion dollar tuna industry, the U.S. nuclear test legacy in the Marshall Islands, and the impact of out-migration, 'Idyllic No More' addresses the often difficult problems and choices facing the Pacific islands today. The author, says

veteran Oceania journalist Floyd K. Takeuchi, "frames a view of the Pacific islands that's characterized by hard-edge realism while offering a way forward. 'Idyllic No More' is a bracing look at where the islands are today, and what it will take to build a future of hope and opportunity for islanders across the region." 'Idyllic No More' is an excellent resource for stimulating discussion in classes, and for readers interested in contemporary Pacific island issues.

Reforming Urban Transport in India is an attempt to take stock of the various issues our cities and towns are facing in the area of urban transport, efforts made and being made both at the policy level as well as the field level to address the problems, the ever increasing complexities of challenges in the area of urban mobility and some of the laudable initiatives on the ground to handle the problems. This book would be a valuable addition to the limited literature available on the subject of urban transport in India. The topic has not attained much prominence even in the broader discussions on the transport

sector issues in the country. The fact that we address our urban transport issues in a casual manner but there is need to take them up in a focused and purposeful manner and this can no longer be delayed is probably the one loud message which is emerging out of this volume. The wealth of knowledge of the contributors, each one of them having huge experience behind them in this sector, makes the book a valuable addition to the literature and a helpful guide in policy discussions.

"Lively, thought-provoking . . . the plot is ingenious, packing a wallop of a surprise . . . Tepper knows how to write a well-made, on-moving story with strong characters. . . . She takes the mental risks that are the lifeblood of science fiction and all imaginative narrative."—Ursula K. LeGuin, Los Angeles Times Since the flames died three hundred years ago, human civilization has evolved into a dual society: Women's Country, where walled towns enclose what's left of past civilization, nurtured by women and a few nonviolent men; and the adjacent garrisons where warrior men live—the lost brothers, sons, and lovers of those in Women's Country. Two societies. Two competing dreams. Two ways of life, kept apart by walls stronger than stone. And yet there is a gate between them. . . . "Tepper not only keeps us reading . . . she provokes a new look at the old issues."—The Washington Post "Tepper's cast of both ordinary and extraordinary people play out a powerful drama whose significance goes beyond sex to deal with the toughest problem of all, the challenge of surmounting humanity's most dangerous flaws so we can survive—despite ourselves."—Locus *UPTET Social Studies 2021 | 8 Mock tests + 2 Previous Year*

The new second edition of this distinctive and widely adopted textbook brings into the classroom an overview of how images of social problems can shape not only public policy and social services, but also the ways in which we make sense of ourselves and others. It introduces two primary changes. First, some attention is devoted to the "new social movements" that emphasize social change through identity transformation rather than through structural change. Second, the text now also looks more closely at the importance of emotions in constructing public consciousness of social problems. When the first edition was published, Teaching Sociology noted, "Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well research and engaging, yet with tremendous attention to detail and accuracy... [W]ould provide a solid base for any social problems class." Contemporary Sociology wrote that the book is "engagingly well written in a personal, unpretentious style, and well informed by the author's knowledge of the professional literature."
