This anthology, edited by Scott Plous, can be used as a main text or supplementary text for courses on prejudice, discrimination, and diversity. It includes a unique collection of readings edited, adapted, or updated specifically for this anthology — some of which have never been published before.

Interdisciplinary in scope and wide-ranging in

approach, the anthology combines research articles, opinion polls, legal decisions, news reports, personal narratives, and more. Several readings come from people on the receiving end of prejudice (often referred to as "targets" of prejudice), whereas other readings focus on perpetrators, bystanders, and social institutions. Note: The book can also be used in conjunction with UnderstandingPrejudice.org, a web site that includes interactive exercises and demonstrations, multimedia materials, tips for instructors, and other prejudice-related resources.

Ships' Bilge Pumps Routledge

A pioneering neuroscientist draws on detailed studies to demonstrate the correlation between social environments and health, offering insight into the differences between chronic loneliness and depression while explaining how social isolation can affect perceptions, behavior,

and physiology. Reprint.

Essays on the Research Process

Texas A&M University Press

Beginning with early sixteenth-century documents that recorded bilge pump design and installation and ending at about 1900, when bilge pumps were being mass-produced, Oertling covers a period of radical technological change. He describes the process of making long wooden pump tubes by hand, as well as the assembly of the machine-crafted pumps that helped revolutionize ship construction and design. Also given in detail are the creation, function, and development of the three types of pumps used from about 1500 to well into the nineteenth century: the burr pump, the "suction" or common

pump, and the chain pump. Of further interest is Oertling's overall examination of the nature and management of leaks in ships' hulls.

Perspectives on Assessment, Research, and Applications

University of Chicago Press

This volume shows mental health providers how to integrate cultural factors into cognitive behavior therapy (CBT).

Contributing authors describe the application of CBT with clients of diverse cultures, and discusses how therapists can refine CBT to increase its effectiveness with clients from a variety of cultural backgrounds. They examine the unique characteristics of, and the use of CBT with various racial,

ethnic, and religious minority groups in the United States including Latinx, Asian Americans, African Americans, American Indians, Alaska natives, Arabs, and Orthodox Jews. Strategies for using CBT with older adults, individuals with disabilities, and LGBTQ clients are also examined. A chapter on culturally responsive CBT clinical supervision closes this volume. This second edition includes fully-updated demographic information, a greater emphasis on culture-specific assessments, and a chapter on using CBT with clients of South Asian descent.

Advances in Experimental Social Psychology PublicAffairs

One of the most brilliantly original of American pragmatists, George Herbert Mead published surprisingly few major papers and not a single book during his lifetime. Yet his influence on American sociology and social psychology since World War II has been exceedingly strong. This volume is a revised and enlarged

edition of the book formerly published under the title *The Social Psychology of George Herbert Mead*. It contains selections from Mead's posthumous books: *Mind, Self, and Society*; *Movements of Thought in the Nineteenth Century*; *The Philosophy of the Act*; and *The Philosophy of the Present*, together with an incisive, newly revised, introductory essay by Anselm Strauss on the importance of Mead for contemporary social psychology. The 'Stubborn Particulars' of

Social Psychology gives students an alternative approach to social psychology which acknowledges the limits of shared understandings often imposed by class, race, culture, nationality, ethnicity, language and gender. Frances Cherry shows how the generation of hypotheses, experimental practice, the interpretation of results and the process of scientific communication itself are equally framed by historical and cultural context. She discusses how to begin to understand one's own

biases and prejudices, and how we create and make sense of our own social psychology as an engaged social critic, rather than as some idealised 'objective' scientist. The 'Stubborn Particulars' of Social Psychology should be required reading for all social psychology students as an antidote to their course text.

This book critically examines the work of a number of pioneers of social psychology, including legendary figures such as Kurt Lewin, Leon Festinger, Muzafer Sherif, Solomon Asch, Stanley Milgram, and Philip Zimbardo. Augustine Brannigan argues that the reliance of these psychologists on experimentation has led to questions around validity and replication of their studies. The author explores new research and archival work relating to these studies and

outlines a new approach to social psychology, and the social experimentation that repudiates the sciences. Practice and Supervision

Kendall Hunt

Psychology and the Conduct of Everyday Life moves psychological theory and research practice out of the laboratory and into the everyday world. Drawing on recent developments across the social and human sciences, it examines how people live as active subjects within the contexts

of their everyday lives, using this as an analytical basis for understanding the dilemmas and contradictions people face in contemporary society. Early chapters gather the latest empirical research to explore the significance of context as a cross-disciplinary critical tool; they include a study of homeless Māori men reaffirming their cultural identity via gardening, and a look at how the dilemmas faced by children in difficult situations can provide insights into social conflict at school. Later chapters examine the interplay

between everyday life around the world and contemporary global phenomena such as the rise of the debt economy, the hegemony of the labor market, and the increased reliance on digital technology in educational settings. The book concludes with a consideration of how social psychology can deepen our understanding of how we conduct our lives, and offer possibilities for collective work on the resolution of social conflict.

Revisiting the Classic Studies is a series of texts that introduces readers to the studies in psychology that changed the way we think about core topics in the discipline today. It provokes students to ask more interesting and challenging questions about the field by encouraging a deeper level of engagement both with the details of the studies themselves and with the nature of their contribution. Edited by leading scholars in their field and written by

researchers at the cutting edge of these developments, the chapters in each text provide details of the original works and their theoretical and empirical impact, and then discuss the ways in which thinking and research has advanced in the years since the studies were conducted.

Revisiting the Classic Studies in Social Psychology traces 12 ground-breaking studies by researchers such as Asch, Festinger, Milgram, Sherif, Tajfel and Zimbardo to re-examine and reflect on their findings and engage in a lively discussion of the subsequent

work that they have inspired. Suitable for students on social psychology courses at all levels, as well as anyone with an enquiring mind
