From two leading child and adolescent mental health experts comes a guide for the parents of every college and college-bound student who want to know what's normal mental health and behavior, what's not, and how to intervene before it's too late. "The title says it all...Chock full of practical tools, resources and the wisdom that comes with years of experience, *The Stressed Years of their Lives* is destined to become a well-thumbed handbook to help families cope with this modern age of anxiety." —Brigid Schulte, Pulitzer Prize-winning journalist, author of *Overwhelmed* and director of the Better Life Lab at New America All parenting is in preparation for letting go. However, the paradox of parenting is that the more we learn about late adolescent development and risk, the more frightened we become for our children, and the more we want to stay involved in their lives. This becomes particularly necessary, and also particularly challenging, in mid- to late adolescence, the years just before and after students head off to college. These years coincide with the emergence of many mood disorders and other mental health issues. When family psychologist Dr. B. Janet Hibbs's own son came home from college mired in a dangerous depressive spiral, she turned to Dr. Anthony Rostain. Dr. Rostain has a secret superpower: he understands the arcane rules governing privacy and parental involvement in students' mental health care on college campuses, the same rules that sometimes hold parents back from getting good care for their kids. Now, these two doctors have combined their expertise to corral the crucial emotional skills and lessons that every parent and student can learn for a successful launch from home to college.

"The more the Eagle Academy approach and its successes can be shared, the more opportunities young people will have to find their way to their own triumphs." —Wes Moore, New York Times

bestselling author of *The Other Wes Moore* From New York City public schools chancellor David Banks—a respected educator who has advised Hillary Clinton and Cory Booker on scholastic issues—comes a "rare book that can bring tears to your eyes while showing the way to deep and meaningful social change" (New York Times bestselling author William Pollack). In this country, the failure of black and Latino men in schools has become the norm. Some go as far to say that young men of color are helpless cases and they are treated as such in school. Though this unfair experience hits brown and black boys the hardest, the underlying causes are shared by boys of many backgrounds. There needs to be a change, and David Banks had some ideas to help at-risk boys. In 2004, he petitioned New York City's mayor to allow an all-boys public school to open in one of the most troubled districts in the country, the South Bronx. He had a point to prove: when rituals that boys are innately drawn to are combined with college prep-level instruction and community mentorship, even the most challenging students can succeed. The result? The Eagle Academy for Young Men—the first all-boys public high school in New York City in more than thirty years—has flourished and has been successfully replicated in five locations in the city and in Newark, New Jersey. In *Soar*, Banks shares the experiences of individual kids from the Eagle Academy as well as his own personal story. He reveals the specific approach he and his team use to drive students, from tapping into their natural competitiveness and peer-sensitivity, to providing rituals that mimic their instinctual need for hierarchy and fraternal camaraderie, to finding teachers who know firsthand the obstacles these students face. Results-oriented and clear-eyed about the challenges and promises of educating boys at risk, *Soar* is "a must-read for those concerned with the welfare of young men" (Kirkus Reviews).

In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of

kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.
