They're hallmarks of childhood. The endless "why" questions. The desire to touch and taste everything. The curiosity and the observations. It can't be denied-children have an inherent desire to know. Teachers and parents can either encourage this natural inquisitiveness or squelch it. There is joy in the classroom when children learn-

not to take a test, not to get a grade, not to compete with each other, and not to please their parents or their teachers-but because they want to know about the world around them! Both Christian educators and parents will find proven help in creating a positive learning atmosphere through methods pioneered by Charlotte Mason that show how to develop a child's natural love of learning. The professional educators, administrators, and Mason supporters contributing to this volume give useful applications that work in a variety of educational settings, from Christian schools to homeschools. A practical follow-up to Crossway's For the Children's Sake, this book follows a tradition of giving serious thought to what education is, so that children will be learning for life and for everlasting life.

I Can't Believe You Just Said That Crossway

Parents and Children is a work by Charlotte M. Mason. It focuses on home-schooling methods but also delves into the role of parents as inspirers to learning.

The Original Home Schooling Series Penguin

This is Charlotte Mason as you have not seen her before: Mind to Mind is her well-seasoned final work, originally titled An Essay Towards a Philosophy of Education. Divested of outdated material, the essential philosophy is brought into sharp relief. Ms. Mason wrote, "The message for our age is, Believe in mind, and let education go straight as a bolt to the mind of the pupil." Our generation needs to hear that message more acutely than ever. Karen Glass, with deep respect for the original, has preserved the essentials in Ms. Mason's own words, while delivering the material in a format that speaks to today's readers. This book is an abridgment in the literal Latin sense of "to shorten." What has been shortened is not merely the length of the original volume, but the path between the modern reader and the mind of Charlotte Mason. In this book, Charlotte Mason presents the vital principles that underlie her methods, and with the confidence of many decades of practice behind her, recommends those methods to a wider audience. She wanted to reform and regenerate the educational practices of Great Britain in the early 20th century, but 21st century readers will find her ideas just as potent, just as penetrating, and even more refreshing than they were when they were originally penned. Her first principle is "Children are born persons": not machines, not animals, not accidental conglomerations of cells, but persons, with all the magnificent possibilities that personhood implies. The education we

should offer a person is the education Charlotte Mason offers to us.

Parents and Children Thorndike Striving Reader

Over the last four decades, American hospitals have seen a steady increase in children suffering from psychological disorders, peer violence, and suicide attempts. To figure out why this is happening and how to put an end to it, child psychologist Dr. Charlotte Peterson has been spending six months every five years living in indigenous villages and observing their parenting practices. What she's found is that the people of peaceful cultures, particularly the Tibetan, Bhutanese, and Balinese people, know something we Westerners, despite our modernity, don't, and their children are happier, healthier, and more

balanced because of it. What Dr. Peterson has found is that the children in these cultures are raised with a high degree of cherishing and empathy. Attachments are promoted by intensive nurturing of infants and gentle, clear limit-setting with toddlers that teaches self-control and builds self-esteem. The result, as Dr. Peterson has found after visiting these places again and again, is children who are trusting, enjoyable, and kind, —not “spoiled,” as we might imagine. The Mindful Parent brings together Dr. Peterson's village interviews, observations, research, and over thirty-five years of work as a psychologist to teach modern parents how to raise healthier, more well-balanced, and kinder children. It includes creative ideas from parents who are currently adopting these practices and balancing other aspects of their personal, career, and financial responsibilities to assure their children get the support they need to thrive.

"Working On A Song is one of the best books about lyric writing for the theater I've read."—Lin-Manuel Miranda Anaïs Mitchell named to TIME's List of the 100 Most Influential People in the World of 2020 An illuminating book of lyrics and stories from Hadestown—the winner of eight Tony Awards, including Best Musical—from its author, songwriter Anaïs Mitchell with a foreword by Steve Earle On Broadway, this fresh take on the Greek myth of Orpheus and Eurydice has become a modern classic. Heralded as “The best new musical of the season,” by The Wall Street Journal, and “Sumptuous. Gorgeous. As good

as it gets," by The New York Times, the show was a breakout hit, with its poignant social commentary, and spellbinding music and lyrics. In this book, Anais Mitchell takes readers inside her more than decade's-long process of building the musical from the ground up—detailing her inspiration, breaking down the lyrics, and opening up the process of creation that gave birth to Hadestown. Fans and newcomers alike will love this deeply thoughtful, revealing look at how the songs from "the underground" evolved, and became the songs we sing again and again.

Formation of Character is the fifth volume of Charlotte Mason's Homeschooling series. The chapters stand alone and are valuable to parents of children of all ages. Part I includes case studies of children (and adults) who cured themselves of bad habits. Part II is a series of reflections on subjects including both schooling and vacations (or "stay-cations" as we now call them). Part III covers various aspects of home schooling, with a special section detailing the things that Charlotte Mason thought were important to teach to girls in particular. Part IV consists of examples of how education affected outcome of character in famous writers of her day. Charlotte Mason was a late nineteenth-century British educator whose ideas were far ahead of her time. She believed that children are born persons worthy of respect, rather than blank slates, and that it was better to feed their growing minds with living literature and vital ideas and knowledge, rather than dry facts and knowledge filtered and pre-digested by the teacher. Her method of education, still used by some private schools and many homeschooling families, is gentle and flexible, especially with younger children, and includes first-hand exposure to great and noble ideas through

books in each school subject, conveying wonder and arousing curiosity, and through reflection upon great art, music, and poetry; nature observation as the primary means of early science teaching; use of manipulatives and real-life application to understand mathematical concepts and learning to reason, rather than rote memorization and working endless sums; and an emphasis on character and on cultivating and maintaining good personal habits. Schooling is teacher-directed, not child-led, but school time should be short enough to allow students free time to play and to pursue their own worthy interests such as handicrafts. Traditional Charlotte Mason schooling is firmly based on Christianity, although the method is also used successfully by s

After Charlotte Mason died in 1923, the PNEU held a memorial service in her honor, though (quite appropriately) it more resembled an educational conference. Dozens of friends, acquaintances, admirers, students and fellow educators attended the event. Those who had spent years observing her life and work warmly described her impact on their own lives and careers. These sentiments-some philosophical, some personal-were recorded in the book you are now holding. In Memoriam is biography, memoir and philosophical commentary all in one. It offers the most intimate look at Charlotte Mason from those who knew and loved her best. As you read their touching words, you will come to appreciate the tremendous impact of this gifted woman whose philosophy and method of self-education transformed generations of teachers, parents and students-not only in her life but in her death, as well.

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of

the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child’s mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Set aside ineffective practices, such as scolding, ignoring

the offense, or merely administering punishment. Ginger Hubbard, the bestselling author of *Don’t Make Me Count to Three!*, lays out a simple, Bible-based strategy for parents to help their kids tame their tongues and walk in the transforming power of Christ. Are you ever embarrassed or shocked by what comes out of your child’s mouth? Do you raise your voice, threaten, and coerce, but find yourself frustrated because nothing seems to work? In *I Can’t Believe You Just Said That!*, Ginger Hubbard provides a practical, three-step plan to reach beyond the behaviors of tongue-related struggles—such as lying, tattling, and whining—to address your child’s heart. After all, as Matthew 12:34 tells us, “the mouth speaks what the heart is full of.”

An eye-opening look inside pre-K in America and what it will take to give all children the best start in school possible. At the heart of this groundbreaking book are two urgent questions: What do our young children need in the earliest years of school, and how do we ensure that they all get it? Cutting-edge research has proven that early childhood education is crucial for all children to gain the academic and emotional skills they need to succeed later in life. Children who attend quality pre-K programs have a host of positive outcomes including better language, literacy, problem-solving and math skills down the line, and they have a leg up on what appears to be the most essential skill to develop at age four: strong self-control. But even with this overwhelming evidence, early childhood education is at a

crossroads in America. We know that children can and do benefit, but we also know that too many of our littlest learners don't get that chance—millions of parents can't find spots for their children, or their preschoolers end up in poor quality programs. With engrossing storytelling, journalist Suzanne Bouffard takes us inside some of the country's best pre-K classrooms to reveal the sometimes surprising ingredients that make them work—and to understand why some programs are doing the opposite of what is best for children. It also chronicles the stories of families and teachers from many backgrounds as they struggle to give their children a good start in school. This book is a call to arms when we are at a crucial moment, and perhaps on the verge of a missed opportunity: We now have the means and the will to have universal pre-kindergarten, but we are also in grave danger of not getting it right.
