The Great Reawakening did not come quietly. Across the country and in every nation, people began to develop terrifying powers—summoning storms, raising the dead, and setting everything they touch ablaze. Overnight the rules changed...but not for everyone. Colonel Alan Bookbinder is an army bureaucrat whose worst war

wound is a paper-cut. But after he develops magical powers, he is torn from everything he knows and thrown onto the front-lines. Drafted into the Supernatural Operations Corps in a new and dangerous world, Bookbinder finds himself in command of Forward Operating Base Frontier—cut off, surrounded by monsters, and on the brink of being overrun. Now, he must find the will to lead the people of FOB Frontier out of hell, even if the one hope of salvation lies in teaming up with the man whose own magical powers put the base in such grave danger in the first place—Oscar Britton, public enemy number one...

The Year When Stardust Fell NYU Press

Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is

the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

The Winter Ghosts
Oxford University Press,
USA

From the New York Times bestselling author of Sepulchre and Labyrinth-a compelling story of love, ghosts and remembrance. World War I robbed England and France of an entire generation of friends, lovers and futures. In Freddie Watson's case, the battlefields took his beloved brother and, at times, his peace of mind. In the winter of 1928, still seeking some kind of resolution, Freddie is travelling through the beautiful but forbidding French Pyrenees. During a snowstorm, his car

spins off the mountain road. Freezing and dazed, he stumbles through the woods, emerging in a tiny village, where he finds an inn to wait out the blizzard. There he meets Fabrissa, a lovely young woman also mourning a lost generation. Over the course of one night, Fabrissa and Freddie share their stories. By the time dawn breaks, Freddie will have unearthed a tragic mystery that goes back through the centuries, and discovered his own role in the life of this old remote town. By turns thrilling, poignant, and haunting, this is a story of two lives touched by war and transformed by courage.

Thoughts in The Meantime Last night I watched the sunrise while I cried, because in that moment surely a piece of me had died I watched as my childhood lost its sweet

taste of innocence traveling into adulthood skipping all of the steps in between Leaving me with a heart that did not know on whom it should lean And, this morning I watched the sun set on my soul burning my insides until I had no choice but to let go as my adolescence left my body so that I could become whole Last night I quietly sat back in the distance and watched myself turn from a young lost girl of this world to a woman and child of God...

The adventurous
Countess Harleigh
finds out just how far
some will go to
safeguard a secret in
Dianne Freeman ' s
latest witty and
delightful historical
mystery . . . Though
American by birth,
Frances Wynn, the now
widowed Countess of
Harleigh, has adapted
admirably to the quirks
and traditions of the
British aristocracy. On
August twelfth,
otherwise known as
the Glorious Twelfth,
most members of the
upper class retire to
their country estates
for grouse-shooting
season. Frances has

little interest in
hunting—for birds or a
second husband—and is
expecting to spend a
quiet few months in
London with her almost-
engaged sister, Lily,
until the throng returns.
Instead, she ' s
immersed in a shocking
mystery when a friend,
Mary Archer, is found
murdered. Frances had
hoped Mary might make
a suitable bride for her
cousin, Charles, but
their courtship recently
fizzled out.
Unfortunately, this puts
Charles in the
spotlight—along with
dozens of others. It
seems Mary had
countless notes hidden
in her home, detailing
the private
indiscretions of
society ' s elite. Frances

can hardly believe that the genteel and genial Mary was a blackmailer, yet why else would she horde such juicy tidbits? Aided by her gallant friend and neighbor, George Hazelton, Frances begins assisting the police in this highly sensitive case, learning more about her peers than she ever wished to know. Too many suspects may be worse than none at all—but even more worrying is that the number of victims is increasing too. And unless Frances takes care, she 'll soon find herself among them . . .

headsets, video games

have been at the epicenter of our ever-evolving

technological reality.

Unlike other media

technologies, video games demand engagement like

no other, which begs the

question—what is the role

that video games play in

our lives, from our homes,

to our phones, and on global culture writ large? How to Play Video Games brings together forty original essays from today's leading scholars on video game culture, writing about the games they know best and what they mean in broader social and cultural contexts. Read about avatars in Grand Theft Auto V, or music in The Legend of Zelda: Ocarina of Time. See how Age of Empires taught a generation about postcolonialism, and how Borderlands exposes the seedy underbelly of capitalism. These essays suggest that understanding video games in a critical context provides a new way to engage in contemporary culture. They are a must read for fans and students of the medium.

U.S. Air Force Major Michael Donnelly was diagnosed with ALS, Lou Gehrig's Disease, after his tour of duty in Desert Storm. When the Pentagon denied any connection between his illness and his service in the Gulf War, Donnelly testified before the House of Representatives in 1998, leading to recommendations for studies into the group of symptoms displayed by Gulf veterans which have become known as "Persian Gulf syndrome."

The Australian Renovator's Manual
Greenwood Publishing Group
Third Sister in the Tao family, Ailin has watched her two older sisters go through the painful process of having their feet bound. In China in

1911, all the women of good families follow this ancient tradition. But Ailin loves to run away from her governess and play games with her male cousins. Knowing she will never run again once her feet are bound, Ailin rebels and refuses to follow this torturous tradition. As a result, however, the family of her intended husband breaks their marriage agreement. And as she enters adolescence, Ailin finds that her family is no longer willing to support her. Chinese society leaves few options for a single woman of good family, but with a bold conviction and an indomitable spirit, Ailin is determined to forge her own destiny. Her story is a tribute to all those women whose courage created new options for

the generations who came after them.

The pebbles used in ancient abacuses gave their name to the calculus, which today is a fundamental tool in business, economics, engineering and the sciences. This introductory book takes readers gently from single to multivariate calculus and simple differential and difference

equations. Unusually the book offers a wide range of applications in business and economics, as well as more conventional scientific examples. Ideas from univariate calculus and linear algebra are covered as needed, often from a new perspective. They are reinforced in the two-dimensional case, which is studied in detail before generalisation to higher dimensions. Although there are no theorems or formal proofs, this is a serious book in which conceptual issues are explained carefully using numerous geometric devices and a wealth of worked examples, diagrams and exercises. Mathematica has been used to generate many beautiful and accurate, full-colour illustrations to help students visualise complex mathematical objects. This adds to the accessibility of the text, which will appeal to a wide audience among students of mathematics, economics and science.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class

postwar America.
