Parts Of The Eye Worksheet

The transparent bump in the front of the eye is the . e.The focuses light on the back of the eyeball. f.The changes light the eye receives into nerve signals. g.The carries nerve signals from the eye to the brain. WORD BANK. The emours oundationidsealth. eproduction permitted for individual classroom use.

FREE! - The Human Eye Labelling Activity (teacher made)

Light from the object you are looking at passes through the lens of your eyes and is picked up by the retina. The retina changes the light into nerve signals so the brain can understand

what the eye is seeing. But, when the image hits the retina, it is upside down, so the optic nerve sends messages to the brain.
