The LEGO Principle OMF Literature

What if your daughter’s propensity for “feeling all the feels” is actually a good thing? Teens and tweens have a reputation for letting their emotions get the best of them, so much so that we often wonder if our families (and the world) wouldn’t be better off if these young women we love could feel just a little less. But as Linda Barrick discovered, these emotions play an important role in the spiritual lives of young women, and, when they learn to direct them rightly, their feelings can be a powerful force for good in their lives, homes, and schools. That’s why Linda and her daughter Jen wrote this devotional for teen girls. After Linda’s daughter, Jen, was in a traumatic car accident, Jen was in many ways “frozen” at age fifteen and completely uninhibited. That means Jen still says what she’s thinking and feeling almost all the time. Because of this Jen’s mom, Linda, got a unique glimpse into the inner world of young women, and she realized that the emotions young teen girls feel are a beautiful gift. It gives them the ability, like Jen, to have an unhindered, best-friend relationship with their Heavenly Father. In this 30-day devotional for young teen girls, Jen Barrick, with the help of her mom, Linda Barrick, compiled her own real-life prayers with passages from Psalms in order to speak directly to the heart of young women. It will teach these teens and tweens how to cultivate a deep, emotional relationship with the God who loves them. Each day will: address a different feeling and examine it in light of God’s truth from a short passage of Psalms affirm young women’s feelings as a gift of God demonstrate how their emotions are meant to lead them closer to God show them how to make their faith stronger when they use God’s Word to navigate their emotions

From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

How do we interrupt the current paradigms of sexism in the academy? How do we construct a new and inclusive gender paradigm that resists the dominant values of the patriarchy? And why are these agendas important not just for women, but for higher education as a whole? These are the questions that these extensive and rich analyses of the historical and contemporary roles of women in higher education– as administrators, faculty, students, and student affairs professionals–seek constructively to answer. In doing so they address the intersection of gender and women’s other social identities, such as of race, ethnicity, sexual orientation, class, and ability. This book addresses the experiences and position of women students, from application to college through graduate school, and the barriers they encounter; the continuing inequalities in the rates of promotion and progression of women and other marginalized groups to positions of authority, and the gap in earnings between men and women; and pays particular attention to how race and other social markers impact such disparities, contextualizing them across all institutional types. Written collaboratively by an intergenerational group of women, men, and transgender people with different social identities, feminist perspectives, and professional identities– and who, in the process, built upon each other’s work–this volume constitutes a call to educators and scholars to work toward centering feminist and other marginalized perspectives in their practice and research in order to equitably address the evolving complexities of college and university life. Employing a wide range of theoretical lenses, examining a variety of models of practice, and giving voice to a diversity of personal experiences through narrative, this is a major contribution to the scholarship on women in higher education. This is a book for all women in the academy who want to better understand their experience, and to dismantle the remaining barriers of sexism and oppression–for themselves, and future generations of students. Based on the National Study of Youth and Religion--the same invaluable data as its predecessor, *Soul Searching: The Religious and Spiritual Lives of American Teenagers*--Kenda Creasy Dean's compelling new book, *Almost Christian*, investigates why American teenagers are at once so positive about Christianity and at the same time so apathetic about genuine religious practice. In *Soul Searching*, Christian Smith and Melinda Lundquist Denton found that American teenagers have embraced a "Moralistic Therapeutic Deism"--a hodgepodge of banal, self-serving, feel-good beliefs that bears little resemblance to traditional Christianity. But far from faulting teens, Dean places the blame for this theological watering down squarely on the churches themselves. Instead of proclaiming a God who calls believers to lives of love, service and sacrifice, churches offer instead a bargain religion, easy to use, easy to forget, offering little and demanding less. But what is to be done? In order to produce ardent young Christians, Dean argues, churches must rediscover their sense of mission and model an understanding of being Christian as not something you do for yourself, but something that calls you to share God's love, in word and deed, with others. Dean found that the most committed young Christians shared four important traits: they could tell a personal and powerful story about God; they belonged to a significant faith community; they exhibited a sense of vocation; and they possessed a profound sense of hope. Based on these findings, Dean proposes an approach to Christian education that places the idea of mission at its core and offers a wealth of concrete suggestions for inspiring teens to live more authentically engaged Christian lives. Persuasively and accessibly written, *Almost Christian* is a wake up call no one concerned about the future of Christianity in America can afford to ignore.

Many societies assign sharply distinguished roles to men and women. Personality differences, as well as physical differences, between men and women are used to justify these different sex roles, and women are seen as more emotionally and interpersonally sensitive than men, while men are said to be more competent, achievement oriented, and assertive than women. A widely held view is that not only do men and women differ but that possession of "masculine" characteristics precludes possession of "feminine" characteristics. This bipolar conception has led to the definition of masculinity and femininity as opposites. Acceptance of this idea has caused social scientists and laypersons to consider men and women who possess cross-sex personality characteristics as less emotionally healthy and socially adjusted than those with sex-appropriate traits. Previous research by the authors and others, done almost exclusively with college students, has shown, however, that masculinity and femininity do not relate negatively to each other, thus supporting a dualistic rather than a bipolar conception of

these two psychological dimensions. Spence and Helmreich present data showing that the dualistic conception holds for a large number of groups, varying widely in age, geographical location, socioeconomic status, and patterns of interest, whose psychological masculinity and femininity were measured with an objective instrument, the Personality Attributes Questionnaire, devised by the authors. Many individuals are shown to be appropriately sex-typed; that is, men tend to be high in masculinity and low in femininity and women the reverse. However, a substantial number of men and women are androgynous—high in both masculine and feminine characteristics—while some are not high in either. Importantly, the authors find that androgynous individuals display more self-esteem, social competence, and achievement orientation than individuals who are strong in either masculinity or femininity or are not strong in either. One of the major contributions of the work is the development of a new, multifaceted measure of achievement motivation (the Work and Family Orientation Questionnaire), which can be used successfully to predict behavior in both males and females and is related to masculinity and femininity in both sexes. In addition to investigating the correlates of masculinity and femininity, the authors attempt to isolate parental factors that contribute to the development of these characteristics and achievement motivation. The book includes analyses of data from students on their perception of their parents, which enable the authors to examine the influence of parental masculinity and femininity and parental behaviors and child-rearing attitudes on the development of masculinity and femininity and achievement motivation characteristics in their children. The important implications of these findings for theories of sex roles, personality development, and achievement motivation are examined.

How (Not) to Be Secular is what Jamie Smith calls "your hitchhiker's guide to the present" -- it is both a reading guide to Charles Taylor's monumental work *A Secular Age* and philosophical guidance on how we might learn to live in our times. Taylor's landmark book *A Secular Age* (2007) provides a monumental, incisive analysis of what it means to live in the post-Christian present -- a pluralist world of competing beliefs and growing unbelief. Jamie Smith's book is a compact field guide to Taylor's insightful study of the secular, making that very significant but daunting work accessible to a wide array of readers. Even more, though, Smith's *How (Not) to Be Secular* is a practical philosophical guidebook, a kind of how-to manual on how to live in our secular age. It ultimately offers us an adventure in self-understanding and maps out a way to get our bearings in today's secular culture, no matter who "we" are -- whether believers or skeptics, devout or doubting, self-assured or puzzled and confused. This is a book for any thinking person to chew on.
