Corruption in Higher Education BRILL

This book focuses on two areas of substantial and growing importance to the human development and capability approach: health and disability. The research on disability, health and the capability approach has been diverse in the topics it covers, and the conceptual frameworks and methodologies it uses, beginning over a decade and a half ago in health and more than a decade ago in disability. This book shares a set of contributions in these two areas: the first set of chapters focusing on disability; and the second set focusing on health and the health capability paradigm (HCP), in particular. This book was originally published as a special issue of the Journal of Human Development and Capabilities.

Higher Education Pathways BoD – Books on Demand

This book explores the complexities of community colleges and global counterparts by focusing on critical analysis of governance, leadership, and mission. These complexities represent emerging and evolving phenomena that impact the institutions' ability to a) serve students; b) offer sound curricula; c) admit and retain students; d) increase completion rates; e) create viable and sustained partnerships locally and internationally; f) address the needs of unique populations; g) funding and sustainability, and h) support staff development to enhance faculty and staff excellence. This work will introduce and elaborate upon these topics to highlight not only the challenges of the field in a variety of countries worldwide, but to also begin to build comparative understanding of the field at large. In that these institutions are now identified, it is time to academically address their role in higher education.

Questions and Answers Organization for Economic

This book inquires into the global wave of student mobilizations that have arisen in the aftermath of the economic crisis of 2008, accounting for their historical and sociological significance. More specifically, its eleven chapters explore the role of students as political actors: their ability to build effective organizations, to make political alliances with other actors, and to win public consensus, as well as their impact on cultural, political, and policy outcomes. To do so, the volume examines case studies in England, Chile, South Africa, Quebec, and Hong Kong, covering Europe, Africa, Asia, and North and Latin America. Grouped into two major sections, the collection covers the organizational structures of student movements and their alliances and outcomes. Ultimately, this volume examines the understudied political aspects of student unrest, exploring how student mobilizations—driven by indebtedness, precariousness, the corporatization of the university, and other issues—correspond to larger processes of change with wider implications in society.

South African Undergraduate Education and the Public Good Springer

This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities, and makes a compelling argument for the university as a public good, in spite of current trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities, asset-based community development, and the adult learning concept of dialogue, to propose a model whereby the boundary walls of the university become metaphorically 'porous', so that community members feel free to interact with the university as equal members of society. A historical outline of African universities is provided, as well as an exploration of the evolution of terms for community engagement, service learning and learning cities; and an examination of the policy and practice implications for the ideological model of a porous university.

Education, Learning, Training Springer Science & Business Media

Higher level vocational education and training (VET) programmes are facing rapid change and intensifying challenges. What type of training is needed to meet the needs of changing economies? How should the programmes be funded? How should they be linked to academic and university programmes? How can employers and unions be engaged? This report synthesises the findings of the series of country reports done on skills beyond school. Chapters cover the following areas: Chapter 1. The hidden world of professional education and training; Chapter 2. Enhancing the profile of professional education and training; Chapter 3. Three key elements of high-quality post-secondary programmes; Chapter 4. Transparency in learning outcomes; Chapter 5. Clearer pathways for learners; Chapter 6. Key characteristics of effective vocational systems

Two of the Guests Orange Groove Books

Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research.

This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy,

planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

Skills Beyond School Springer

This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas covered: The Changing World of Work | Editors: Margarita Pavlova and Salim Akoojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners | Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

Higher Education in the Era of the Fourth Industrial Revolution International Monetary Fund

This report identifies effective strategies to tackle skills imbalances in South Africa.

Handbook of Technical and Vocational Education and Training Research OECD Publishing

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Handbook of Vocational Education and Training Passbooks

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges.

Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on:

- The political economy of TVET types in different countries which, by comparison, illuminate the South African case;
- A periodisation of government interventions in the TVET sector over the last three decades;
- The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service;
- The halting evolution of collegial relationships between college lecturers towards higher collegiality;
- Employer expectations of college graduates and how colleges are responding; and
- An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape.

This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

Change Management in TVET Colleges Springer

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

Trends, challenges and opportunities for growth Palgrave Macmillan

THIS BOOK WILL SOON BECOME AVAILABLE AS OPEN ACCESS BOOK This book examines multiple facets of language diversity and mathematics education. It features renowned authors from around the world and explores the learning and teaching of mathematics in contexts that include multilingual classrooms, indigenous education, teacher education, blind and deaf learners, new media and tertiary education. Each chapter draws on research from two or more countries to illustrate important research findings, theoretical developments and practical strategies. This open access book examines multiple facets of language diversity

Introduction to Information Processing Saint Philip Street Press

This volume focuses on current demands, challenges and expectations facing African higher education institutions in general, and those in South Africa in particular. Subsequently, transformative curricula, pedagogies and epistemologies that define diverse practices of access and inclusion within the context of transformation and decolonisation are explored.

Educational Psychology Glencoe/McGraw-Hill School Publishing Company

"The lack of academic integrity combined with the prevalence of fraud and other forms of unethical behavior are problems that higher education faces in both developing and developed countries, at mass and elite universities, and at public and private institutions. While academic misconduct is not new, massification, internationalization, privatization, digitalization, and commercialization have placed ethical challenges higher on the agenda for many universities. Corruption in academia is particularly unfortunate, not only because the high social regard that universities have traditionally enjoyed, but also because students-young people in critical formative years-spend a significant amount of time in universities. How they experience corruption while enrolled might influence their later personal and professional behavior, the future of their country, and much more. Further, the corruption of the research enterprise is especially serious for the future of science. The contributors to Corruption in Higher Education: Global Challenges and Responses bring a range of perspectives to this critical topic" --

Rethinking Post-school Education and Skills Training AOSIS

The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers — thus far overlooked — a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on

education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is that authors used the comparative method in education, that is comparing the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive national projects of establishing world-class universities, with Project 985, Project 211, and the “ Double First Class University ” project. The chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries.

New Directions for Health Services Delivery Springer

The DSST (Defense Activity for Non-Traditional Education Support) Subject Standardized Tests are comprehensive college and graduate level examinations given by the Armed Forces, colleges and graduate schools. These exams enable students to earn college credit for what they have learned through self-study, on the job, or by other non-traditional means.

Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa ' s Education System The Stationery Office

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society.

Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits.
