Life Orientation Gr12 T/g Oswaal Books and Learning Private Limited

This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives. There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice. The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever-increasing usage of mathematics in business, the environment, industry and everyday life. The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics. The book will be of interest to teachers, practitioners and researchers in universities, polytechnics, teacher education, curriculum and policy.?

Informal language learning beyond the classroom plays an important and growing role in language learning and teaching. This Handbook brings together the existing body of research and unites the various disciplines that have explored this area, in order to present the current state of knowledge in one accessible resource. Much of adult learning takes place outside of formal education and for language learning, it is likely that out-of-class experiences play an equally important role. It is therefore surprising that the role of informal language learning has received little attention over the years, with the vast majority of research instead focusing on the classroom. Researchers from a range of backgrounds, however, have started to realise the important contribution of informal language learning, both in its own right, and in its relationship with classroom learning. Studies in the areas of learner autonomy, learning strategies, study abroad, language support, learners' voices, computer-

mediated communication, mobile-assisted language learning, digital gaming, and many others, all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences, drawing from a wide range of resources, including materials, teachers, self-study, technology, other learners and native speakers. This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom.
