Entrepreneurship Book (For Term I Nov-Dec 2021 Exam) Unbound Publishing

Foucault and School Leadership

Research illustrates the application of Foucauldian theory to an educational leadership research context, thus staging the ways a researcher negotiates the methodological tensions and contradictions in the conduct of qualitative inquiry within education research. The book draws on an empirical study of a multi-site school collaborative that investigates relations of power within the unfolding network among the various leadership hierarchies in school governance. The book is anchored around a narrative dramatization that the author, Denise Mifsud,

crafts from her data, using the dramatic play as a medium to present her research findings so as to show rather than just tell readers about network leadership dynamics. Mifsud's innovative use of dramatization to communicate her findings and analysis serves to problematize the representation of qualitative research, as well as to incorporate researcher interpretation and explicate the intertwining nature of theory and methodology. Through the use of Foucauldian theory, mainly his notions of webs of power, discipline, governmentality, discourse, and subjectification, the research narrative critiques and problematizes traditional understandings of educational leadership. The book focuses on and demonstrates the challenging enterprise of the art of theory application in method by outlining the epistemological, operational and analytical challenges encountered: the application of Foucauldian concepts in education research contexts; the adaptation of methodological and theoretical concerns; in addition to showing how the quality of research outcomes is shaped by social theory.

Report of the Federal Security Agency Springer

The advent of Coronavirus (also known as COVID-19) pandemic has caused much distress, despondence, fear and pandemonium across all nations of the world. In Zimbabwe, the emergence of the virus sent a chilling message of insecurity and need for conscientiousness and diligence, as the virus decimated humankind amid untold suffering. The pandemic came as a litmus test for the integrity and meticulousness of all the so-called professionals and institutions of integrity across the country, challenging them to stand equal to their tasks, titles and claimed astuteness. For Zimbabwe and Africa in general, the manifestation and ramifications of COVID-19, has raised so many questions around issues of people's welfare and innovative research, especially amid the reality that the country is dependent on charity and donations from well-wishers for the vaccines it needs, over and above the modest amount it can purchase. This reality and related challenges pose interesting research questions addressed in this volume. A central question on the possibility and extent of home-grown

solutions inspired by and tailored to the needs and predicaments of Zimbabwe and the African continent. The richness of the book is in the firsthand eyewitness accounts of scholars caught up in the COVID-19 challenge. The researchers in this volume have sought to capture developments, insights and evolutions as they unfold and progress. The book is handy for scholars in policy studies, risk and disaster management, social anthropology, political science, development studies, African studies and decolonial fields of studies.

This book addresses the links between climate change and the threats it poses to sustainable development, from a distance education perspective. Discussing current trends and challenges in sustainable development education, climate literacy and

innovations in climate change education, it contributes to the global debate on the implementation of education for sustainability. It also assesses the role that e-learning can play in this process, addressing pedagogical concepts as well as the wide range of technological options now available.

Oswaal CBSE Sample Question Papers + MCQs Question Bank Chapterwise Class 10 (Set of 8 Books) Mathematics Standard, Science, Social Science, English (For Term I Nov-Dec 2021 Exam) Routledge

The recent socio-political changes in Nepal have brought assimilationist notions of Nepali nationalism under a tight scrutiny and drawn attention to more plural, inclusive, and diverse notions of Nepaliness.

However, both assimilationist and pluralist visions continue to remain normative in their approach, and often posit ethnic and national identity in opposition to each other. Drawing on the everyday practices in the two schools, this book illustrates that social actors in minority language education did not necessarily select between minority identity and national identity, but instead made simultaneous claims to more than one social identity by discursively positioning 'ethnic identity' as 'national identity'. It builds on the notion of 'simultaneity' to illustrate that it is through the 'unresolved co-presences' of apparently contradictory ways that people maintain their multi-layered identities. By arguing for an analytical necessity to adopt relational approach, it

aims to complicate the neat compartmentalisation of identities.

Cleverlands Oswaal Books and Learning Private Limited

This book presents an exceptional collection of 11 articles on contemporary research studies that address current and critical issues of researches, theories and practices in the fields of mathematics education at various levels from primary to tertiary education. In addition, the book covers various innovative research studies from both local and abroad such as cognitive diagnostic assessment (CDA) and assessment for learning (AfL), teaching and learning of mathematics using the dynamic geometry software (DGS), action-process-object-schema (APOS) theory and relationship

mapping and inverse (RMI) principle, as well as mathematics lesson structure (MLS) and collaborative lesson research (CLR). The contents of this book should be of interest to both national and international researchers and scholars, particularly mathematics educators, mathematics education researchers, teacher trainers, university students, teachers, curriculum planners, as well as policymakers.

The slopes of Mount Kilimanjaro offer a fertile land, a cool climate, and an abundance of water that over many years wars were fought in attempts to conquer and settle. The people living on the slopes of Mount Kilimanjaro are the Chagga. Historically, there were many alliances that led to security, but also there were betrayals that led to division into small kingdoms ruled by chiefs locally known as mangi. At the end of the wars, the slopes were divided into three major areas named Rombo, Vunjo, and Hai, each ruled by a number of mangi. The seniority of each mangi was measured by his wealth. The population increased rapidly as peace was established. The people on the slopes of the mountain live very closely, packed with water and road facilities comparable to a large metropolitan city, but only with trees and foliage, not concrete. First, Hai was highly populated, followed by Vunjo, but Rombo was sparsely populated as it was the leeward side of the mountain. Before the time of Touwa schooldays, the Nanjara village, which is in that Europeans were in pursuit to grab some of that land. It was in that state of competition that the local mangi sent vanguards like Touwas grandfather and many others to occupy the land to prevent European settlement. That was how the Nanjara village came to existence. The Chagga people have basically one culture, one language with area-based differences of accents, and Nanjara village life could reflect life for all Chagga people.

Mathematics Education from an Asian Perspective (Penerbit USM) Routledge First published in 1966, Experiment and Tradition in Primary Schools was written to provide an account of the author ' s pioneering study of the attainment of young children in schools where the curriculum was shaped by their spontaneous interests. The book describes the findings of

Gardner ' s work and assesses them in detail. It will have lasting relevance for those with an interest in the history of education and the development of education in infant and junior schools.

In the context of outcomes-based school governance, statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school, instructional, and professional development. However, very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level,

and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view. Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.

Elsevier

As a teacher in an inner-city school, Lucy Crehan was exasperated with ever-changing government policy claiming to be based on lessons from ' top-performing ' education systems. She resolved to find out what was

really going on in the classrooms of countries whose teenagers ranked top in the world in reading, maths and science. Cleverlands documents Crehan ' s journey around the world, weaving together her experiences with research on policy, history, psychology and culture to offer extensive new insights into what we can learn from these countries.

Elasticity and Toughness Routledge

Sierra Leone is historically unique. A small part of the territory which was mainly Freetown (which was to become the capital of the whole country) and surrounding areas was acquired by the British in the late eighteenth century and used to resettle emancipated slaves and their descendants from America and Britain. That part which was formerly known as the Colony became home to a heterogeneous people (the Creoles) who would later play a significant role in the development of the country out of which intellectual light would radiate

across the region. However, six years after gaining independence in April 1961, Sierra Leone would become embroiled in serious political turmoil exacerbated by a series of military coups and followed by eleven years of an atrocious civil war. In Reflections on Sierra Leone by a Former Senior Police Officer, author and retired officer Ezekiel Coker offers an introspective look into both the history and personal experiences of life in a declining, once prosperous West African country. Part memoir and part history, Coker provides insight into his own encounters with the military, imprisonment, and his new life, and he details a comprehensive living history of Sierra Leones social and political landscape following its independence with a comparison of life in the country when it was under British colonial rule. Once a shining star in the region, the ravages of civil war and political upheaval have culminated in a quagmire in which the country now wallows. It is the hope that a better understanding of an often

undocumented, unheard history will provide a roadmap for restoring Sierra Leone to its former prosperity as a beacon of West Africa.

Child Cultures, Schooling, and Literacy African Books Collective

Suitable for high school students with high mathematics ability and people above high school level. High school students with higher mathematics ability should learn more in-depth Mathematical Olympiad topics through independent learning methods to further improve their mathematics level, which is conducive to studying university subjects in the future.

Experiment and Tradition in Primary Schools Pascal Press

From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in

three major settings: in countries such as Japan and Brazil where English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications, which is grounded in literacy theory as well as in practical constraints such as available human and material resources.
