The Official Index to the Financial Times Edexcel GCSE Maths 2015

IGCSE Mathematics for Edexcel, 2nd edition has been updated to ensure that this second edition fully supports Edexcel's International GCSE Specification A and the Edexcel Certificate in Mathematics. Written by an experienced examiner, teacher and author, this is the perfect resource for Higher Tier students. Each chapter starts with key objectives and a starter activity to introduce students to the content, and the straightforward explanations, worked examples and practice questions which follow cover every type of problem students are likely to face in their final exam. 'Internet challenges' also ensure regular and integrated use of ICT. The book is accompanied by an interactive CD-ROM, which includes a digital version of the book, answers to all the questions and Personal Tutors to accompany every topic. Personal Tutors are interactive audio-visual presentations of worked examples which help students consolidate their learning. This Student's Book is accompanied by IGCSE Mathematics Practice for Edexcel, 2nd edition, which contains a wealth of exam-style questions, and IGCSE Mathematics Teacher's Resource for Edexcel, which provides teaching and learning support.

Edexcel Chemistry Retrieval Practice Research & Resources for every classroom

This pack contains six realistic exam-style practice papers for Higher level GCSE Maths. It also includes a formula sheet and detailed answer book so that students can mark their own work.

Alex's Adventures in Numberland REVISE Edexcel GCSE Geog 09

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think

critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

GCSE Geography Edexcel B REVISE Edexcel GCSE Maths 2015

A hugely enjoyable, brilliantly researched explanation of the basic principles of maths.

IGCSE Mathematics for Edexcel Practice
Hodder Education

Test questions are provided for each chapter of this textbook, together with detailed mark schemes to make assessment easy. Two

versions of each question are provided. One allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organized by unit/chapter is also included in this resource.
