Science Pearson Education Ltd  
Improving Secondary Science Teaching has been written to help teachers both new and experienced reflect on their current practice and consider how to improve the effectiveness of their teaching. The book examines each of the common teaching methods used in science in relation to pupils' learning and provides guidance on management issues and

---

procedures. With underlying themes such as pupils' interest in science and their motivation to learn; how pupils learn science; the type of science currently being taught in school; and the value of educational research; the book includes chapters on: the improvement process planning for progression and continuity promoting pupils' learning dealing with differences making use of information from assessment learning about the nature of science This timely book will be of interest to practising science teachers, particularly those who are working to improve the management of science departments or their own teaching practice. It will also be a valuable

resource for science education researchers and students on higher degree courses in science education.

French (inc. Audio CD) Letts and Lonsdale

Francis Joseph Cassavant is eighteen. He has just returned home from the Second World War, and he has no face. He does have a gun and a mission: to murder his childhood hero.

Francis lost most of his face when he fell on a grenade in France. He received the Silver Star for bravery, but was it really an act of heroism? Now, having survived, he is looking for a man he once admired and respected, a man adored by many people, a man who also received a Silver Star for bravery. A man who destroyed Francis's life.
