As a transdisciplinary profession, evaluation has much to offer to global change interventions that work toward a sustainable future across national boundaries, sectors, and issues. This book introduces Blue Marble evaluation, which provides a framework for developing, adapting, and evaluating major systems change initiatives involving complex networks of stakeholders. Michael Quinn Patton demonstrates how the four overarching principles and 12 operating principles of this innovative approach allow evaluators, planners, and implementers to home in on sustainability and equity issues in an intervention. Compelling case examples, bulleted review lists, charts, and 80 original exhibits and graphics connect the global and local, the human and ecological. Rooted in utilization-focused, developmental, and principles-focused evaluation, Blue Marble evaluation is designed to tackle problems outside the reach of traditional evaluation practice.

The SAGE Handbook of Applied Social Research Methods, Second Edition provides students and researchers with the most comprehensive resource covering core methods, research designs, and data collection, management, and analysis issues. This thoroughly revised edition continues to place critical emphasis on finding the tools that best fit the research question given the constraints of deadlines, budget, and available staff. Each chapter offers key guidance on how to make intelligent and conscious tradeoffs so that one can refine and hone the research question as new knowledge is gained, unanticipated obstacles are encountered, or contextual shifts take place - all key elements in the iterative nature of applied research. Each chapter has been enhanced pedagogically to include more step-by-step procedures, specific, rich yet practical examples from various settings to illustrate the method,

parameters to define when the method is most appropriate and when it is not appropriate, and greater use of visual aids (graphs, models, tip boxes) to provide teaching and learning tools. - twenty core chapters written by research experts that cover major methods and data analysis issues across the social and behavioral sciences, education, and management; - emphasis on applying research techniques, particularly in "real-world" settings in which there are various data, money, time, and political constraints; - new chapters on mixed methods, qualitative comparative analysis, concept mapping, and internet data collection; - a newly developed section that serves as a guide for students who are navigating through the book and attempting to translate the chapters into action; - a new Instructor's Resources CD, with relevant journal articles, test questions, and exercises to aid the instructor in developing appropriate course materials.

Responding to evaluator and instructor demand, this book presents a diverse set of high-quality developmental evaluation (DE) case studies. Twelve insightful exemplars illustrate how DE is used to evaluate innovative initiatives in complex, dynamic environments, including a range of fields and international settings. Written by leading practitioners, chapters offer a rare window into what it takes to do DE, what roles must be fulfilled, and what results can be expected. Each case opens with an incisive introduction by the editors. The book also addresses frequently asked questions about DE, synthesizes key themes and lessons learned from the exemplars, and identifies eight essential principles of DE. See also Michael Quinn Patton's Developmental Evaluation, the authoritative presentation of DE.

This book takes seriously the notion that evaluation practice should be guided by attention to criteria of excellence. This book builds on the work of evaluation standards committee (1981), The evaluation network, the evaluation research society, and the various disciplinary associations in their efforts to improve the quality of applied social science. In so doing, this book explores the practical implications of conducting evaluations that exhibit four fundamental criteria of excellence: Utility, feasibility, propriety and accuracy

inquiry frameworks, and analysis options available today. Now offering more balance between applied research and evaluation, this Fourth Edition of *Qualitative Research & Evaluation Methods* illuminates all aspects of qualitative inquiry through new examples, stories, and cartoons; more than a hundred new summarizing and synthesizing exhibits; and a wide range of new highlight sections/sidebars that elaborate on important and emergent issues. For the first time, full case studies are included to illustrate extended research and evaluation examples. In addition, each chapter features an extended "rumination," written in a voice and style more emphatic and engaging than traditional textbook style, about a core issue of persistent debate and controversy.

Introduces the reader to qualitative approaches--a major development in the field of evaluation during the last decade. This volume presents an introduction to the approach--differentiates it in the method and philosophy from more traditional quantitative methods; specifies the kinds of evaluation questions for which it is most appropriate; and explains the design decisions and sampling strategies which underlie its implementation. Step-by-step guides for planning and conducting fieldwork and observations; doing in-depth interviewing; analyzing, interpreting and reporting results; and many examples--from a wide range of disciplines and professions--clarify the use of qualitative methods in evaluations.

An Introduction SAGE

In *Action Research Methods*, the authors acknowledge that the methodology component is where most of the struggle and confusion lies with students in research methods courses. The overall aim is to assist master's level education students with practical and theoretically grounded approaches to the action research process.

Qualitative Evaluation Methods Rowman & Littlefield

Michael Quinn Patton's *Facilitating Evaluation: Principles in Practice* is the first book of its kind to explain in depth and detail how to facilitate evaluation processes with stakeholders. Using the author's own stories of his experiences as an evaluation facilitator, the book illustrates the five evaluation facilitation principles that are the organizing framework for addressing how to work with stakeholders to generate evaluation questions, make decisions among methods, interpret findings, and participate in all aspects of evaluation. Ultimately, this book will help readers perform facilitation to enhance the relevance, credibility, meaningfulness, and utility of evaluations. "A must-read for anyone considering a high-impact evaluation!" --Margaret Lombe, Boston College

Qualitative Inquiry in Evaluation John Wiley & Sons

The second edition of Patton's classic text retains the practical advice of the original. It shows how to conduct an evaluation in a way that will be useful -- and actually used. Patton has included new stories, new examples, new research findings, and more of his evaluation humour. He adds to the original book's insights into the changes in evaluation during the past decade and incorporates recent research on utilization.

Integrating Theory and Practice Guilford Press

This book provides step-by-step instructions on how to analyze text generated from in-depth interviews and focus groups, relating predominantly to applied qualitative studies. The book covers all aspects of the qualitative data analysis process, employing a phenomenological approach which has a primary aim of describing the experiences and perceptions of research participants. Similar to Grounded Theory, the authors' approach is inductive, content-driven, and searches for themes within textual data.

On The Life and Death Importance of Thinking Guilford Publications

Topics in this selection include the definition and recognition of qualitative data, qualitative method strategies, theoretical bases and ideals for qualitative research, and the development of multimodal evaluation designs. The compatibility of qualitative evaluation methods with different evaluation models and processes is presented. Patton sets forth a checklist of evaluation situation for which qualitative methods are appropriate. Part II deals with collecting qualitative data. Covered in this section are such things as strategies and techniques for qualitative interviewing, the stages of fieldwork, the importance of field notes, and various methods of observation.
