To assist in addressing DoD's modernization challenges, the Ronald W. Reagan National Defense Authorization Act for FY 2005 requires the DoD to, among other things, report specific information about business system investments, including: (1) milestones and actual performance against specified measures and any revisions; and (2) actions taken to certify that a modernization investment involving more than \$1 million meets defined

conditions before obligating funds. This report focused on the FY 2010 report's compliance with, these provisions of the act. Illus. This is a print-on-demand publication; it is not an original.
