Engines are like greetings; they get the train going. Freight wagons are like different speakers' turns; it is good to have at least a few when you are in conversation. A set of points guiding a train from one track to another is like a tactful change in the topic of conversation. When a conversation veers off-topic it is like a derailed train. As well as attractive colour photographs of trains, the book contains engaging photocopyable worksheets and colouring pages to help promote skill generalisation. This highly visual approach to conversation is ideally suited to children with ASDs aged approximately 5-13.
