We live in a data-driven world, and the goal of this Canadian text is to teach students how to access and analyze these data critically. Canadian authors Jim Stallard and Michelle Boué emphasize that learning statistics extends beyond the classroom to an essential life skill, and want Canadian students to develop a "data habit of mind." Regardless of their math backgrounds, students will learn how to think about data and how to reason using data. With a clear, unimimidating writing style and carefully chosen pedagogy, this text makes data analysis accessible to all students. **KEY TOPICS:** Introduction to Data; Picturing Variation with Graphs; Numerical

This prealgebra text helps prepare
students for higher-level math courses
by integrating basic algebraic concepts
early and continuing to revisit those

concepts throughout the text. Student comprehension is aided by the friendly composition and current, relevant applications. Student motivation is increased by immersion in genuine and realistic mathematical situations. This prealgebra text, as a part of the Lial/Hornsby/Miller developmental worktext series, focuses on students by helping them reduce their confusion of symbols for subtraction with negative numbers. The text also clearly demonstrates why the product of two negative numbers is a positive number and explains why letters instead of numbers are used in algebra. This text helps students solve applied problems and increases their proficiency in solving fraction and percent problems.

This accessible text is designed to help readers help themselves to excel. The content is organized into three parts: (1) A Library of Elementary Functions (Chapters 1 – 2), (2) Finite Mathematics (Chapters 3 – 9), and (3) Calculus (Chapters 10 – 15). The book's overall approach, refined by the authors' experience with large sections of college freshmen, addresses the challenges of learning when readers' prerequisite knowledge varies greatly. Reader-friendly features such as Matched Problems, Explore & Discuss questions, and Conceptual Insights, together with the motivating and ample applications,

make this text a popular choice for today's students and instructors.

In *Statistics for Business: Decision Making and Analysis*, authors Robert Stine and Dean Foster of the University of Pennsylvania 's Wharton School, take a sophisticated approach to teaching

statistics in the context of making good business decisions. The authors show students how to recognize and understand each business question, use statistical tools to do the analysis, and how to communicate their results clearly and concisely. In addition to providing cases and real data to demonstrate real business situations, this text provides resources to support understanding and engagement. A successful problem-solving framework in the 4-M Examples (Motivation, Method, Mechanics, Message) model a clear outline for solving problems, new What Do You Think questions give

students an opportunity to stop and check their understanding as they read, and new learning objectives guide students through each chapter and help them to review major goals. Software Hints provide instructions for using the most up-to-date technology packages. The Second Edition also includes expanded coverage and instruction of Excel® 2010. Prealgebra Prentice Hall

Michael Sullivan's Statistics: Informed Decisions Using Data, Fourth Edition, connects statistical

concepts to students' lives, helping them to think critically, become informed consumers, and make better decisions. Throughout the book, "Putting It Together" features help students visualize the relationships among various statistical concepts. This feature extends to the exercises, providing a consistent vision of the bigger picture of statistics. This book follows the Guidelines for Assessment and Instruction in Statistics Education (GAISE), as recommended by the American Statistical Association, and emphasizes statistical literacy, use of real data and technology, conceptual understanding, and active learning.
