&>With You Every Step of the Way The

Tobey/Slater/Blair/Crawford series

retains the hallmark characteristics that

have always made the text so easy to

learn and teach from, including a

"building block" organization. Each

program builds essential skills and

conceptual understanding by breaking

the mathematics down into manageable

pieces. The new editions address the

latest trends and dynamics related to

developmental mathematics course

structures, including helping students

gain a stronger conceptual

understanding, while contextualizing the

math. Instructors will find the inclusion

of new conceptually oriented Guided

Learning Videos with the accompanying

Video Workbook with the Math Coach

(in MyMathLab), plus a new emphasis

on Career Explorations throughout the

text and MyMathLab course to help

students explore potential career paths.

The Tobey series is flexible, and well-

suited for a variety of classroom

formats, including lecture-based,

computer-lab based (modular and/or

self-paced), hybrid, and online. Also

available with MyMathLab

MyMathLab(R) is an online homework,

tutorial, and assessment program

designed to work with this text to

engage students and improve results.

Within its structured environment,

students practice what they learn, test

their understanding, and pursue a

personalized study plan that helps them

absorb course material and understand

difficult concepts. For this edition, the

MyMathLab course includes new Guided Learning Videos and an updated and expanded Video Workbook with the Math Coach. Math Skills by Objectives teaches basic

math skills and shows students how to apply the skills they have learned to their daily lives. This three-volume program is organized by learning objectives -- subskill by subskill -- so that both students and teachers know exactly what their goals are. The evenly paced, methodical style of instruction develops student confidence and mastery so students never go on to a new subskill or skill unless they have mastered the previous one. Book 3 reviews the basic math operations taught in Book 1 but at a more advanced level.
