For two-semester courses in General Chemistry. A relevant, problem-solving approach to chemistry The 3rd Edition of Principles of Chemistry: A Molecular Approach presents core concepts without sacrificing rigor, enabling students to make connections between chemistry and their lives or intended careers. Drawing upon his classroom experience as an award-winning educator, Professor Tro extends chemistry to the student's world by capturing student attention with examples of everyday processes and a captivating writing style. Throughout this student-friendly text, chemistry is presented visually through multi-level images that help students see the connections between the world around them (macroscopic), the atoms and molecules that compose the world (molecular), and the formulas they write down on paper (symbolic). The 3rd Edition improves upon the hallmark features of the text and adds new assets—Self Assessment Quizzes, Interactive Worked Examples, and Key Concept Videos—creating the best learning resource available for general chemistry students. The full text downloaded to your computer With eBooks you can: search for key concepts, words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf (available as a free download), available online and also via the iPad and Android apps. The Pearson Complete Guide For Aiee 2/e Pearson Higher Ed

For courses in two-semester general chemistry. Tells the story of chemistry in a unified and thematic way while building 21st century skills Bestselling author Nivaldo Tro's premise is

that matter is particulate - it is composed of molecules; the structure of those particles determines the properties of matter. This core idea is the inspiration for his seminal text—Chemistry: Structure and Properties. Dr. Tro emphasizes the relationship between structure and properties, establishes a unique approach to teaching chemistry by presenting atomic and bonding theories early in the course, and stresses key concepts and themes in text, images, and interactive media. The book is organized to present chemistry as a logical, cohesive story from the microscopic to the macroscopic, so students can fully grasp the theories and framework behind the chemical facts. Each topic is carefully crafted to convey to students that the relationship between structure and properties is the thread that weaves all of chemistry together. The 2nd Edition works seamlessly with Mastering™ Chemistry and new eText 2.0 to engage students in active learning and the world of chemistry. Dr. Tro helps readers build 21st century skills, engaging them through new end-of-chapter questions—Data Interpretation and Analysis questions present real data in real life situations and ask students to analyze that data, and Questions for Group Work foster collaborative learning and encourage students to work together as a team to solve problems. Dr. Tro also engages students through the power of video, animations, and real-time assessment with new and expanded interactive media. New Key Concept Videos, newly interactive Conceptual Connections and Self-Assessment Quizzes, and Interactive Worked Examples are embedded in the new eText 2.0 version of the book, enabling students to make connections that they cannot make by simply reading a static page. Also available with Mastering Chemistry Mastering™ Chemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. The enhanced eText 2.0 and Mastering Chemistry work with the book to provide seamless and tightly integrated videos and other rich media and assessment throughout the course. Instructors can assign interactive media before class to engage students and ensure they arrive ready to learn. Students further master concepts through book-specific Mastering Chemistry assignments, which provide hints and answer-specific feedback that build problem-solving skills. With Learning Catalytics™ instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups. Mastering Chemistry now provides students with the new General Chemistry Primer for remediation of chemistry math skills needed in the general chemistry course. Note: You are purchasing a standalone product; MyLab™ & Mastering™ does not come packaged with this content. Maintaining the clear and approachable writing style characteristic of author Karen Timberlake, Basic Chemistry, Fourth Edition, adds to its suite of problem-solving tools and techniques necessary for educational and workforce success. Engaging new features such as Key Math Skills and Core Chemistry Skills, and Math Review Modules allow students of various levels and learning styles to practice and master quantitative skills. Popular features, including "Combining Ideas" sections and end-of-chapter questions, have also been strengthened and expanded. Modern real-world applications help students connect chemical principles to events in their world, while stories involving careers illustrate the importance of chemistry in future careers. Chemistry 2e Pearson Higher Ed For courses in introductory, preparatory, and basic chemistry. Basic Chemistry introduces students to the essential scientific and mathematical concepts of general chemistry. With accessible language and a moderate pace, the text is easy-to-follow for first-

time chemistry students, as well as those hoping to renew their studies of the subject. In the 5th Edition, Bill and Karen Timberlake carefully develop core ideas while relating them to the possibility of future careers. The book guides students through basic chemistry problem solving with engaging visuals and a focus on developing the math skills necessary to be successful in the course. End of chapter questions strategically promote integration of cumulative ideas, allowing students to develop a strong foundation for learning chemistry and encouraging them to continue their studies in the field. The main objective in writing this text is to make the study of chemistry an engaging and a positive experience for students by relating the structure and behaviour of matter to real life. This new edition introduces more problem-solving strategies, more problem-solving guides, new features in the Sample Problems; Try It First before the Solution and Connect in the Analyze the Problem step of the solution, a new Engage feature, new conceptual and challenge problems, and new sets of combined problems. Academic Writing for International Students of Science will help international students to develop their command of academic scientific writing in English. It guides students through the writing process itself, and will help them to produce clear, well-written and well-organised essays and reports. The book covers a range of issues such as how to explain complex ideas clearly and

concisely, how to develop a coherent argument, and how to avoid plagiarism by making effective reference to sources. Through detailed analysis of authentic scientific texts, the book will enhance students' understanding of the nature of academic scientific writing. This will enable them to understand how language and discourse function in a real scientific context. The texts serve as models of good writing and are followed by practice activities which will help students to develop their own writing skills. Key topics include: the writing process; academic scientific style; sentence structure; paragraph development; referring to sources; coherence, argument and critical thinking; academic and scientific conventions. This book will be an invaluable companion to those studying for a science or technology degree in an English-speaking institution. Informative study boxes, model answers and a clear, comprehensive answer key mean that the book can be used for self-study or with guidance in the classroom.
