*No Bones about It* Pearson

For Introductory Earth Science Courses Ideal for undergraduates with little or no science background, Earth Science provides a student-friendly overview of our physical environment that offers balanced, up-to-date coverage of geology, oceanography, astronomy, and meteorology. The authors' texts have always been recognized for their readability, currency, dynamic art program, delivery of basic principles and instructor flexibility. This program will provide an interactive and engaging learning experience for your students. Here's how: Teach with an active learning path: Chapters have been broken up into small manageable sections that help students actively analyze information, assess their progress and think about Earth science. Use art that teaches. Each chapter contains 5-7 SmartFigures. SmartFigures are illustrations that use Quick Response (QR) codes to link students to lecture-style videos. Also found in each chapter and accessed by QR codes are Mobile Field Trips, where students virtually accompany Michael Collier on adventures to explore different landscapes. Cultivate an active learning environment that helps students achieve a deeper understanding of the text.

- Easy, step-by-step instructions for kids to complete experiments at home
- Key Points/Program Differentiators
- Customized for at-home use
- Individual attention
- Uses easy-to-find materials
- Visually engaging and fun to use

Program Overview

The Interactive Science Activities workbooks are designed for the home environment, and modified from the lengthy lab manuals used in schools. They are custom designed at-home activities for students and parents to use on their own or with the Interactive Science grade-level bundles. The Pearson at Home

Interactive Science Activities workbooks provide children with a student-centered approach to scientific discovery. Each hands-on activity presents a child with a challenging question that can be investigated and explored independently or with parent guidance. As part of the directed inquiry process, the child will answer this question by exploring the resources, following the outlined procedures of each activity, collecting data, and drawing conclusions. In some instances, parents might need to help children with certain parts of the activity. Following the directed inquiry, the child will be given an opportunity to expand and demonstrate scientific reasoning by modifying the investigation and designing his or her own experiments to illustrate the concept. Utilizing these activities will encourage every child to think like a scientist and encourage him or her to be inquisitive. This curriculum has been modified specifically for homeschool families. At times, there may be references to print or digital components that are not included within the homeschool bundle. This will not hinder your child's successful completion of the course.

**Earth Science** Pearson Education South Asia

I had never given a thought to the fact that Ava's interest in dinosaurs would eventually lead to a myriad of questions that I was unable to answer due to my complete ignorance on the subject. In today's world, our children are exposed on a daily basis to information that is contradictory to God's word. We need to be constantly, diligently teaching them, instructing them. If we don't, they will access information somewhere else. When Kelly Landgraf's trip to the museum with her young daughter opened her eyes to the evolutionary myths that inundate children at every turn, she became passionate about equipping parents to raise their children in the knowledge of God by filtering evolutionary teachings through the truth of Scripture and creation. As a teacher and a parent who has done extensive research on the evolution v. creationism debate, Kelly is uniquely qualified to speak to parents and children on this subject. While teaching seventh grade in the public school system and studying for her master's of education, Landgraf realized that most American elementary students will never have access to truth about human origins and science unless their parents and churches teach them. In *No Bones About It*, Kelly makes an informed and effective argument for creation that will help children and parents take a stand for truth.
