In the early twenty-first century it had become a cliché that there was a 'God Gap' between a more religious United States and a more secular Europe. The apparent religious differences between the United States and western Europe continue to be a focus of intense and sometimes bitter debate between three of the main schools in the sociology of religion. According to the influential 'Secularization Thesis', secularization has been an integral part of the processes of modernisation in the Western world since around 1800. For proponents of this thesis, the

United States appears as an anomaly and they accordingly give considerable attention to explaining why it is different. For other sociologists, however, the apparently high level of religiosity in the USA provides a major argument in their attempts to refute the Thesis. Secularization and Religious Innovation in the Atlantic World provides a systematic comparison between the religious histories of the United States and western European countries from the eighteenth to the late twentieth century, noting parallels as well as divergences, examining their causes and especially highlighting change over time. This is achieved by a series of themes which seem especially relevant to this agenda, and in each case the theme is considered by two scholars. The volume examines whether American Christians have been more innovative, and if so how far this explains the apparent 'God Gap'. It goes beyond the simple American/European binary to ask what is 'American' or 'European' in the Christianity of the nineteenth and twentieth centuries, and in what ways national or regional differences outweigh these commonalities.

Teaching Recent Global History explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically

innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include:

- An overarching narrative that helps readers address historical arguments;
- Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them;
- Lesson plans suitable for both middle and secondary level classrooms;
- Document-based

questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

The secrets of coaching excellence are already inside you Successful coaching has long been seen as a mental exercise—in order to do right by the teachers you serve, you put theory into practice, establish orderly processes, analyze data effectively, and implement externally mandated reforms. The truth, though, is that truly great coaches derive their success not just from what they do, but also from who they are. This groundbreaking book, based on research from an innovative mixed-methods study, provides a holistic approach to coaching that honors both mind and heart. As you explore the most important

characteristics of the best instructional coaches—caring, authenticity, trustworthiness, flexibility, and more—you'll develop and hone those same characteristics in yourself. Features include:

- A framework and structure for developing the characteristics of effective instructional coaches
- Comprehensive analysis of each characteristic
- Examples and stories of effective coaching in action
- Activities, exercises, and action points
- Resources for encouragement and renewal

School coaches have the power to make a real difference in the lives and futures of teachers and students. By balancing your outward competencies with the inspirational

application of your own inward growth, you'll bring new joy—and success—into your coaching relationships.

Dear students, I want to share a dream with you. I dreamed that a young person of 14 whom I was going to be teaching would become president of the United States during the first half of the twenty-first century. As a teacher, I was struck by this immense responsibility. What should I teach my student about the world as preparation for this awesome task? How could my world history class help this person to mature into an intelligent and humane president and leader of the free world?

This book explores the significance of Ibn Khaldun's magnum opus, the Book of Examples, to our understanding of human history and the disciplines of anthropology, history, and sociology.

Operating outside of the confines of the Western intellectual tradition, Ibn Khaldun's the Book of Examples is perhaps the first attempt to propose a global history of humanity. In doing so, Ibn Khaldun pioneered approaches from what we today term sociology, anthropology, ecology, economics, geography, and urban studies. Drawing upon the

Muqaddima and the other volumes of the Kitab al-Ibar, Cheddadi proposes novel ways of viewing human history and classifying societies. While Ibn Khaldun's attempts to develop a true global history were ultimately flawed, Cheddadi argues that they nevertheless offer pertinent lessons for our attempts to write a global history and to understand the world today. This stimulating and original work on a seminal figure in Islamic sociology and historiography will be of interest to students and researchers across the humanities and social sciences.

The preparation of school-based agriculture teachers has been a part of public education for over 100 years. However, there is a

lack of texts available that address the components of teacher education in agriculture including teacher preparation and related activities. Further study that goes beyond concepts to include practice and applications is required in order to further develop educators in this sector. Preparing Agriculture and Agriscience Educators for the Classroom provides an up-to-date consideration of the best practices for developing and enhancing a complete teacher preparation program and highlights and showcases concepts and applications. It is a mainstay for teacher education and teacher preparation in agriculture and is applicable anywhere in the world where teaching agriculture exists. Covering a range of topics such as field experiences and student learning, this reference work is ideal for researchers, scholars,

practitioners, academicians, administrators, instructors, and students.

Debunking the Myths of Colonization.
examines Salman Rushdie's thesis on the paradoxical nature of colonialism and its horrific impact on the psyche of the colonized. It probes Frantz Fanon's theories concerning the relationship between colonizers and colonized, and attempts to apply these theories to modern Arabic literature. Like Rushdi and Fanon, many Arab writers have embarked on a journey to the metropolis of their ex-colonial masters. Due to their encounter with English or French culture, they have written memoirs, poems, or fictions in which they have represented themselves and the 'other.' Their representations differ markedly according to their

own make up as human beings, their class, education, experiences, and gender. Yet what brings them together is their love-hate relationship with the ex-colonizer. In the case of the Palestinian writers, however, there is only bitterness and bewilderment at Israel as a colonizing power in the 21st century and its Jewish citizens, who were once victims in Europe but now have turned into victimizers.

In this important new book, Paul T. Phillips argues that most professional historians - aside from a relatively small number devoted to theory and methodology - have concerned themselves with particular, specialized areas of research, thereby ignoring the fundamental questions of truth, morality, and meaning. This is less so in the thriving general community of history enthusiasts beyond academia, and may explain, in part at

least, history's sharp decline as a subject of choice by students in recent years. Phillips sees great dangers resulting from the thinking of extreme relativists and postmodernists on the futility of attaining historical truth, especially in the age of "post-truth." He also believes that moral judgment and the search for meaning in history should be considered part of the discipline's mandate. In each section of this study, Phillips outlines the nature of individual issues and past efforts to address them, including approaches derived from other disciplines. This book is a call to action for all those engaged in the study of history to direct more attention to the fundamental questions of truth, morality, and meaning.

The World Book

Encyclopedia Springer Nature

Jesus very presence as the New Testament age unfolded (1st century A.D.), engendered opposition, created conflict, while ushering in grace. His ideas were considered radical. Why is this so? The NIV Archeological Study Bible (2005), NIV Student Bible, et al. and corroborating Extra-Biblical evidence provide a context for the Word view about Jesus in Biblical history, and supports aspects of the social and physical sciences in terms of cultural, socio-economic, political, historical, archeological, and philosophical (apologetics) evidence. As the pages of this book unfold, there is an internal consistency

with social science and The Bible.

However, where such consistency appeared to diverge, this author attempts to filter out the noise by applying critical thinking criteria to a Worldview that may not be consistent with the Word view. The goal of this book therefore is to provide some exposition (Greek apologia) of the Word and see how the World fits. Born again Christians can be credible scientists and not compromise Gods Word. With its brief, global (rather than West-centered) approach, *World History in Brief*, Fourth Edition seeks to show how different civilizations developed in a global context, and then encountered the various forces of contemporary life. The brevity of this

text allows instructors to take advantage of additional readings. Rather than overwhelm students, the chief goal of *World History in Brief* is to present the big picture, to facilitate comparison and assessment of change, and to highlight the major developments in the world's history. Finally, this text also presents the global interactions of major civilizations so that students can compare and assess changes.

The future of theatre

history studies requires consideration of theatre as a global phenomenon. The Challenge of World Theatre History offers the first full-scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective. This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections. It moves beyond the conventional nation-based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history. Finally, the book outlines a history that recognizes the often-connected developments in theatre across Eurasia and around the world. It makes the case that world theatre history is necessary not only for itself, but for the powerful comparative and contextual insights it offers to all theatre scholars and students, whatever their special areas of interest.
