The organization of the Student Activities Manual (SAM) parallels that of the student text.

Activities corresponding to each Tema in the textbook recycle and reinforce the vocabulary and grammar presented in the textbook. The Diario at the end of the activities for Temas 2 and 4 guides students in writing paragraphs on the topics of the chapter. As in the textbook, the communicative nature of activities has been maintained so that students are required to think about the meaning of what they are writing, and grammatical forms are not practiced without relating them to meaning. The order of the activities follows directly the order of presentation of vocabulary and grammar in the corresponding Tema of the textbook, so that instructors who cover only part of a Tema during a class can easily assign the matching activities from that Tema of the SAM. As in the textbook, the final Tema of the SAM reviews material from throughout the chapter contextualized in a real-life setting. This SAM volume corresponds to Volume 2 of the Hoy día textbook.

Providing the truly communicative, deeply culture-focused approach instructors believe in along with the guidance and tools students need to be successful using a program with highly

communicative goals-with Mosaicos, there is no need to compromise. Recognizing the primacy of the relationship between culture and language, the new Sixth Edition of Mosaicos places culture up front and center, and everywhere in-between! NEW! A new form-focused activity follows the presentation of grammar. Students can do them in class with the instructor or as online homework before coming to class as all Compreendes activities are machine-gradable and include immediate feedback when completed within MySpanishLab. In these quick, form-focused activities students check that they are able to produce the new grammatical forms before moving to the contextualized and communicative activities. The continuing activity sequence moves students gradually from meaningful, form-focused activities towards production of open-ended, personalized communication. The activities focus attention on the communicative purpose of the linguistic structures while invoking culturally-relevant contexts. All activities require students to process meaning as well as form so that they develop skill in using their linguistic knowledge to gather information, answer questions, and resolve problems. For example, note that the even the form-focused activities require students to process meaning, not just fill in blank with the correct response, making the connection between meaning and form. For good reason, the grammar section is called Funciones y formas -- a hallmark of the Mosaicos approach!
