"Giddyup, giddyup as fast as you can. You can't catch me,

I'm the Gingerbread Man!" The Gingerbread Cowboy can run from the rancher, he can dash past the javelinas, and he can giddyup right by the cattle grazing on the mesa. But what happens when he meets a coyote sleeping in the sun? Janet Squires and Holly Berry retell this classic tale with a Wild Western flair, filled with rodeo-romping fun.

"On the basis of a superficial inspection, Traditions & Encounters might look similar to several other textbooks that survey the world's past. Like

other books, for example, Traditions & Encounters examines the historical development of societies in Asia, Europe, Africa, the Americas, and Oceania. Yet Traditions & Encounters differs from other works in two particularly important ways. First, it relies on a pair of prominent themes to bring a global perspective to the study of world history: it traces the historical development of individual societies in all world regions, and it also focuses attention systematically on interactions between peoples of different societies. Second, it organizes the human past into

seven eras that represent distinct and coherent periods of global historical development"--Preface (Page xvi).

The contents of this Math workbook include multiple chapters and units covering all the required Common Core Standards for this grade level. Similar to a standardized exam, you can find questions of all types, including multiple choice, fill-in-the-blank, true or false, match the

correct answer and free response questions. These carefully written questions aim to help students reason abstractly and quantitatively using various models, strategies, and problem-solving techniques. The detailed answer explanations in the back of the book help the students understand the topics and gain confidence in solving similar problems.
