Following its acclaimed predecessor Pediatrics Recall, this new Second Edition reviews disease entities to facilitate retention and mimic verbal testing covered in a pediatric clerkship. Its unique question-and-answer format is retained. This edition is organized by disease process and involved systems. The text includes descriptions, signs, symptoms, pathophysiology essentials, treatments and possible outcomes. New to this edition are some select figures. Topics cover basic issues in neonatal and pediatric fluid management, blood products, nutrition, growth, emergencies, and intensive care. One chapter is solely devoted to issues relating to the adolescent patient. Easy access design is ideal for clinical rotation usage.

For courses in Pediatric Nursing. A comprehensive  
survey of family-centered pediatric nursing care  
Child Health Nursing: Partnering with Children &  
Families promotes excellence in nursing care for  
infants, children, and adolescents--in hospitals and  
in the community. It focuses on the importance of  
partnering with families to adapt care plans for  
children based on their age, health status, and  
social and cultural influences. The text considers  
the impact of contemporary care environments on  
nursing practice, both in health promotion and in  
the care of children with acute or chronic health  
conditions. By offering industry best practices and  
practical applications, the book encourages students  
to apply evidence-based findings and clinical  
reasoning to planning superior care. The updated  
3rd edition explains how modern nursing practice  
is affected by reforms to healthcare and its delivery--  
such as electronic health records, new approaches  
to chronic and acute condition management, and a  
focus on prevention. To support safe, effective, and  
innovative care, this edition draws on the latest  
recommendations of NANDA International  
diagnoses, Nursing Intervention Classifications  
(NIC), Nursing Outcomes Classifications (NOC),  
and Healthy People 2020. Also available with

Pediatric Board Recertification Review F.A. Davis

Pediatrics Board Review (PBR) was written by Dr. Ashish Goyal to help pediatricians pass the American Board of Pediatrics Initial Certification exam, the MOC recertification exam & the MOCA-Peds exam. The PBR offers a 100% money-back first-time pass guarantee & has had multiple consecutive years of 100% Pass Rates for the MOC exam. PBR has also achieved seemingly unattainable results, such as helping pediatricians finally pass their initial certification exam after up to SEVEN previous failed attempts. PBR's Core Study Guide is now available on mobile devices (e.g., iPhone) and tablets (e.g., iPad).

Get an in-depth look at pediatric primary care through the eyes of a Nurse Practitioner! Pediatric Primary Care, 6th Edition guides readers through the process of assessing, managing, and preventing health problems in infants, children, and adolescents. Key topics include developmental theory, issues of daily living, the health status of children today, and diversity and cultural considerations. This sixth edition also features a wealth of new content and updates — such as a new chapter on pediatric pharmacology, full-color design and illustrations, new QSEN integration, updated coverage of the impact of the Affordable Care Act, a refocused chapter on practice management, and more — to keep readers up to date on the latest issues affecting practice today. Comprehensive content provides a complete foundation in the primary care of children from the unique perspective of the Nurse Practitioner and covers the full spectrum of health conditions seen in the primary care of children, emphasizing both prevention and management. In-depth guidance on assessing and managing pediatric health problems covers patients from infancy through adolescence. Four-part organization includes 1) an introductory unit on the foundations of global pediatric health, child and family health assessment, and cultural perspectives for pediatric primary care; 2) a unit on managing child development; 3) a unit on health promotion and management; and 4) a unit on disease management. Content devoted to issues of daily living covers issues that are a part of every child's growth — such as nutrition and toilet training — that could lead to health problems unless appropriate education and guidance are given. Algorithms are used throughout the book to provide a concise overview of the evaluation and management of common disorders. Resources for providers and families are also included throughout the text for further information. Expert editor team well is well-versed in the scope of practice and
