Pediatric Primary Care - E-Book PasTest Ltd

This revision tool helps readers strengthen their existing knowledge of childhood disorders through Extended Matching Questions (EMQs) on topics frequently asked in Paediatrics examinations, ranging from neonatology to emergency medicine and public health. Detailed answers in each section build comprehension and knowledge. Many medical schools now examine undergraduates using EMQs, but they also feature highly in postgraduate examinations. This revision aid will therefore also be useful to those preparing for postgraduate

examinations such as the Diploma of Child Health (DCH) and Membership of the Royal College of Paediatrics and Child Health (MRCPCH), as well as foundation doctors on their first paediatric rotations and all those wishing to consolidate their knowledge and understanding of Paediatrics.

Questions from NeoReviews
Jones & Bartlett Publishers
Features over 500 questions to help you prepare for your MRCPCH Part 1 exams. With chapters corresponding to those in the 'Essential Revision Notes', this title uses a variety of question formats to test your comprehension of the key points.

Multiple Choice Questions in Pediatric Dentistry Citadel Press

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional pediatric GI references? Are you seeking brief, evidence-based advice for complicated cases or controversial decisions? Curbside Consultation in Pediatric GI: 49 Clinical Questions provides quick answers to the tricky questions most commonly posed during a "curbside consultation" between pediatricians. Drs. Joel R. Rosh and Athos Bousvaros have designed this unique reference which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with pediatric GI. The unique Q&A format provides quick access to current information related to pediatric GI with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references allow readers to browse large amounts of information in an expedited fashion. Some of the questions that are answered:

- How is infantile colic diagnosed and treated?

- How is GERD diagnosed in infants and what are the best treatments?
- How can I optimize my treatment of childhood constipation and does this vary by age?
- How can I effectively intervene in a child that is overweight or obese?
- Celiac disease seems so much more common—is this an epidemic?
- Why have food allergies become so common and what are the most accurate means of diagnosis?

Curbside Consultation in Pediatric GI: 49 Clinical Questions provides information basic enough for residents while also incorporating expert advice that even high-volume pediatricians will appreciate. Pediatricians, nurse practitioners, physician assistants, family practitioners and pediatric residents will benefit from the user-friendly, casual format and the expert advice contained within.

Publications, Incorporated
For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care *Child Health Nursing: Partnering with Children & Families*

promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Get an in-depth look at pediatric primary care through the eyes of a Nurse Practitioner! *Pediatric Primary Care, 6th Edition* guides readers through the process of assessing, managing, and preventing health problems in infants, children, and adolescents. Key topics include developmental theory, issues of daily living, the health status of children today, and diversity and cultural considerations. This sixth edition also features a wealth of new content and updates — such as a new chapter on pediatric pharmacology, full-color design and illustrations, new QSEN integration, updated coverage of the impact of the Affordable Care Act, a refocused chapter on practice management, and more — to keep readers up to date on the latest issues affecting practice today.

Comprehensive content provides a complete foundation in the primary care of children from the unique perspective of the Nurse Practitioner and covers the full spectrum of health conditions seen in the primary care of children, emphasizing both prevention and management. In-depth

guidance on assessing and managing pediatric health problems covers patients from infancy through adolescence. Four-part organization includes 1) an introductory unit on the foundations of global pediatric health, child and family health assessment, and cultural perspectives for pediatric primary care; 2) a unit on managing child development; 3) a unit on health promotion and management; and 4) a unit on disease management.

Content devoted to issues of daily living covers issues that are a part of every child's growth — such as nutrition and toilet training — that could lead to health problems unless appropriate education and guidance are given.

Algorithms are used throughout the book to provide a concise overview of the evaluation and management of common disorders. Resources for providers and families are also included throughout the text for further information.

Expert editor team well is well-versed in the scope of practice and knowledge base of Pediatric Nurse Practitioners (PNPs) and Family Nurse Practitioners (FNPs).
