New York Confessions, 2016 Edition Oxford University Press

Killing a Colored Man's Pedigree is a provocative look at why it is neither cool nor an honor to be a "baby mama." As Harrison compellingly argues, it does not take a village to raise a child; it only takes two married parents. This confrontational in-depth look at the numbers documenting the increased poverty and violent crime blacks are experiencing is proof to Michael Harrison that black American's chickens have come home to roost and that black America is reaping what it has sown for decades. Required reading for anyone who wants to understand the problems plaguing the black community, *Killing a Colored Man's Pedigree* asks questions and provides answers about issues that are seldom if ever discussed because of political correctness. Things you'll learn: - How the high unmarried birthrate among blacks relates to the poverty and crime that plague large parts of the black community and how, as Harrison argues, it may permanently destroy black culture in America - Clinical and scientific research that explains the importance and presence of the alpha male role model, which is woefully absent for the majority of young blacks - How our culture at large, both black and white, tends to worship "baby mamas" and "bad boy black actors," sports stars, musicians, rappers, and the like and how this utterly exacerbates the problem - How modern culture encourages what Harrison terms a "phony victim status" in the black community (which trickles down into poor white culture), particularly among unwed black mothers - How corrupt black politicians whose personal agendas far outweigh the greater good have taken over black leadership and are leading black America astray - Practical solutions to these problems using education, media, and community outreach programs - Harrison's dream of starting a national grass roots effort promoting greater personal responsibility, which could reverse this self-destructive trend and lead to a healthier black community and greater prosperity for all Ringing with passion, anecdotes, and a poignant plea for black America to do an all-around better job of behaving itself and raising kids, Harrison ultimately argues for greater responsibility as the answer to the pervasive problems facing the black community.

Problems in Philosophy of Education canvasses several of the leading issues in philosophy of education. These include the disconnect between the disciplines of philosophy and philosophy of education, the strained relationship between educational practice and philosophy of education, the role of educational

research in philosophy of education, and the lack of an independent scholarship for philosophy of education. James Scott Johnson argues for a philosophy of education separate and distinct from both the disciplines of philosophy and education and claims that philosophy of education should raise and address its own questions and concerns. Supporting this is a model of how philosophy of education should originate basic questions, together with a set of philosophic presuppositions regarding the model's logic, ethics, politics, and relationship to science and social science.
