The Knowledge Gap Routledge

"This book is a must for those who, like me, believe passionately both in the power of peer mediation...and in the urgency of spreading good practice in a society like ours, which is desperately searching for ways to be inclusive and at peace with itself." Tim Brighouse, former Commissioner for London Schools "As the challenges facing young people grow so do the array of support mechanisms to help them. During my time as a Member of Parliament and as a Minister I saw many of the ideas and initiatives which were tackling this issue. I am attracted to the idea of peer mediation mainly because it goes beyond the question of how can we protect and help children when they have a difficulty, and develops those increasingly important social and emotional skills in all children." Estelle Morris, Former Secretary of State, DfES Why use peer mediation? What are the factors that influence its failure or success? Peer mediation as a form of conflict resolution is growing in popularity and usage, particularly within education. The number of schools using this method has increased, with many schools in the UK now using mediation to settle disputes both in school, and in the wider community. Based on the author's extensive work on peer mediation, the book provides a thorough account of theory and practice relating to an approach that can enable young people to resolve their own disputes and those of their peers. The author shows how peer mediation can be embraced by schools to strengthen student voice, behaviour management, active citizenship and inclusion, as well as how it can be neglected and fail to achieve these aims. Drawing on case studies of peer mediation in schools, the book offers an analysis of the work that has been carried out in this area. It revisits key debates in education such as citizenship, social inclusion, student voice and behaviour management in order to begin to address the questions surrounding this method of conflict resolution. Peer Mediation is key reading for primary and secondary school teachers, educational professionals, academics, policy-makers and those with an interest in practical peace making.

Language Activities for Teenagers John Wiley & Sons

For courses in the Guidance and Management of Young Children. The author thoroughly discusses children's conflicts, emphasizing that peer and community culture make up the foundation for preventing and resolving conflict, and advocates teaching conflict resolution skills via a "three-layer-cake" of understanding, management, and resolution. Coverage presents ways to create a caring classroom - both in physical environment and curriculum, to work with other adults in a child's life, and to implement peer mediation. Throughout, the material stresses the need to understand all children in light of applicable theory and current "best practice" in culturally responsive and inclusive classrooms.

Little Peacemakers McGraw-Hill Education (UK)

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
