The original muscle car, the Royal Bobcat GTO was the baby of a burgeoning Detroit subculture, one not sanctioned by the big automakers of the early 1960s. In a post-World War II America hungry for chrome, flash and speed, Royal Pontiac in Royal Oak, Michigan, modified and sold its souped-up versions of GTOs to customers, and in the process created a demand for custom street racers in America. Founded by Ace Wilson, the Royal name became synonymous with speed. This book outlines the history of the Royal Bobcat GTO, from the people--including Milt Schornack, the mechanic who raced for Royal Pontiac and was responsible for the custom Bobcats--to the fabled midnight test runs on northern Detroit's famous Woodward Avenue. Fourteen chapters, illustrated with 25 photographs of vintage GTOs, the infamous Car & Driver road test photos against a Ferrari GTO, and more, chronicle the history of a car that changed the focus of the Detroit auto industry for the next decade. Former editor-in-chief of Hot Rod Magazine Ro McGonegal contributes a foreword.

In 1969, car crashes killed over 1000 Victorians. By 2016, the fatality rate had been cut by 85%, and Victorians are now taking seriously the goal of eliminating death on the roads altogether. This extraordinary achievement is the product of sustained and ground-breaking approaches to preventing injury, saving lives, and optimising recovery. In 2001, the system to care for severely injured people received a major overhaul. The new Victorian State Trauma System halved the risk anyone injured would die, and became the envy of the world. From Roadside to Recovery is the story of the evolution, implementation, and impact of the Victorian State Trauma System, and those who championed it. This story shows what is possible when a community is determined to address the tragedy and cost of road trauma.

Children Adventure Story. The story events are totally not realistic and did not actually happen. Rather, the story is an imaginary one for children 8,9,10 years old. The book is easy to read and has many color illustrations that enhance the story, visually, to stimulate the imagination of the young readers as they read one chapter after another. The story is about one family, parents, daughter and son who traveled to Hollywood Universal Studios, where, while on the tour in the park, the adventures began and continued until a very happy ending. The young readers will be interested to know what happens next and will not want to put the book down until they finish reading the entire story. The story also provides quite a bit of verbal interactions between a sister and a brother that can be used as an example of how to develop good relationships with each other.

Over 100 recipes to help you overcome your difficulties with C++ programming and gain a deeper understanding of the working of modern C++ Key Features Explore the most important language and library features of C++ 17, including containers, algorithms,

regular expressions, threads, and more, Get going with unit testing frameworks Boost.Test, Google Test and Catch, Extend your C++ knowledge and take your development skills to new heights by making your applications fast, robust, and scalable. Book Description C++ is one of the most widely used programming languages. Fast, efficient, and flexible, it is used to solve many problems. The latest versions of C++ have seen programmers change the way they code, giving up on the old-fashioned C-style programming and adopting modern C++ instead. Beginning with the modern language features, each recipe addresses a specific problem, with a discussion that explains the solution and offers insight into how it works. You will learn major concepts about the core programming language as well as common tasks faced while building a wide variety of software. You will learn about concepts such as concurrency, performance, meta-programming, lambda expressions, regular expressions, testing, and many more in the form of recipes. These recipes will ensure you can make your applications robust and fast. By the end of the book, you will understand the newer aspects of C++ 11/14/17 and will be able to overcome tasks that are time-consuming or would break your stride while developing. What you will learn Get to know about the new core language features and the problems they were intended to solve Understand the standard support for threading and concurrency and know how to put them on work for daily basic tasks Leverage C++'s features to get increased robustness and performance Explore the widely-used testing frameworks for C++ and implement various useful patterns and idioms Work with various types of strings and look at the various aspects of compilation Explore functions and callable objects with a focus on modern features Leverage the standard library and work with containers, algorithms, and iterators Use regular expressions for find and replace string operations Take advantage of the new filesystem library to work with files and directories Use the new utility additions to the standard library to solve common problems developers encounter including string_view, any, optional and variant types Who this book is for If you want to overcome difficult phases of development with C++ and leverage its features using modern programming practices, then this book is for you. The book is designed for both experienced C++ programmers as well as people with strong knowledge of OOP concepts.

A burned-out businessman finds respite and romance at a lakeside retreat in this novel for fans of Nicholas Sparks and Karen Kingsbury. A top executive in the family business, Buddy Helms lives and works under the thumb of his powerful father. He ’ s proved himself time and again to the manipulative patriarch—even saving the company from financial ruin. Yet for six years Buddy ’ s waited to hear that he ’ s worthy of his father ’ s love and respect. Now, after another cold dismissal, Buddy ’ s slamming the door on everything he ’ s strived for. Luckily his church counselor recommends just the thing for his disillusionment, frustration, and rage: the solitude of Moondust Lake, a retreat just outside Miramar Bay. Kimberly Sturgiss is a professional psychotherapist whose tragic past has granted her a rare ability to gently release her patients from their self-made prisons. She ’ s well acquainted with the Helms family and the dark burdens that come with them. But the most intriguing challenge of all is Buddy. He and Kimberly share more than she ’ s prepared to admit—the same emotional cage, the guarded heart, and the broken trusts that come with being alive. Maybe it ’ s finally time that Kimberly finds herself, too—by reaching out to the man who ’ s reaching out to her. “ Bunn brings family and friendships to the forefront of this gracefully and skillfully written story.... Full of strong female characters and an excellent plotline. ” —Library Journal

We continue in this second volume the plan evident in the first; i.e., of presenting a number of well-rounded up-to-date reviews of important developments in the exciting field of ion-selective electrodes in analytical chemistry. In this volume, in addition to the exciting applications of ISE'S to biochemistry systems represented by the description of enzyme electrodes, there is featured the most recent development in ISE'S, namely, the joining of the electrochemical and solid state expertise, resulting in CHEMFETS. The scholarly survey of the current status of ISE'S will undoubtedly be welcomed by all workers in the field. Mosquitoes, Communities, and Public Health in Texas focuses on 87 known species of mosquitoes found throughout Texas. It includes information on the ecology, medical and public health importance, and biological diversity of each species. In addition, it provides detailed identification keys for both larval and adult stages of all mosquito genera and species known to occur in Texas, along a review of surveillance and control strategies. The expansion of invasive mosquitoes from other regions (including Mexico), together with climate change occurrences increase the likelihood for an increase in diseases, such as West Nile Virus, Yellow Fever, Dengue, Chikungunya and Zika. This unique work is the first unified reference and resource rich in mosquito information for medical entomologists, mosquito and vector control professionals, pest management professionals, biologists, environmentalists, wildlife professionals, government regulators, instructors of medical entomology and public health professionals who have disease or vector responsibilities, mosquito taxonomists, epidemiologists, entomology students, academia, pest control industry, and libraries, etc., with utility for medical, veterinary and health professionals. Brings into one volume the previously fragmented or unavailable information on the species of mosquitoes found in Texas and neighboring states of Mexico Provides a variety of audiences with key data on mosquito biology, distribution and how to identify each Includes a geographic distribution map, habitat associations, and medical importance on Zika, West Nile virus, Dengue and Chikungunya for each species

Through sleepless ramblings and observations from Newfoundland singer /

songwriter Damhnait Doyle, these journals cover her travels from Afghanistan to Japan and all over Canada on tour both solo and with her Shaye bandmates, Kim Stockwood and Tara MacLean. Sharing insights into the highs and lows of juggling a band and a solo career, and whether she's talking about Advil or karma, bikes or Canadian troops in Kabul, Damhnait Doyle's style is engaging and uniquely personal. The title of this book was found on the door of a dressing room at the 2005 Canadian Songwriter's Hall of Fame event. The room housed Buffy Sainte-Marie, Loreena McKennitt, and many other notable female musicians, and Damhnait Doyle's initial reaction was "'Miscellaneous females' they are not." But upon reflection, she realized that, as writers, she and these other women were speaking for all women who do not have a public voice.

Mirk abbey, by the author of 'Lost sir Massingberd'. Kensington Books Mineral-filled polymer composites are increasingly used for various applications, including automotive, construction, biomedical, maritime, sport, and ballistic, owing to the advantages of low cost, light weight, excellent rigidity, and high mechanical strength. One of two volumes comprising the Mineral-Filled Polymer Composites Handbook, this volume provides an overview of the latest research, trends, applications, and future directions of advanced mineral fiber- reinforced polymer composites. It focuses specifically on material selection, processing, and applications. - Emphasizes the principles governing the behavior of mineral-filled composite materials in the field of engineering and their applications - Covers systematic material selection tools such as Analytical Hierarchy Process (AHP), Analytical Network Process (ANP), and Technique of Ranking Preferences by Similarity of the Ideal Solution (TOPSIS) - Reviews the use of these materials for various engineering applications - Features chapters looking at fabrication techniques and frictional properties - Details current research in polymer nanocomposites and particulate polymer composites This book serves as an excellent reference guide for researchers, advanced students, academics, and industry professionals interested in the synthesis of mineral-filled polymer and biopolymer composites, as well as those pursuing research in the broad fields of composite materials, polymers, organic/inorganic hybrid materials, and nano-assembly.

Discover end-to-end penetration testing solutions to enhance your ethical hacking skills Key FeaturesPractical recipes to conduct effective penetration testing using the latest version of Kali LinuxLeverage tools like Metasploit, Wireshark, Nmap, and more to detect vulnerabilities with easeConfidently perform networking and application attacks using task-oriented recipesBook Description Many organizations have been affected by recent cyber events. At the current rate of hacking, it has become more important than ever to pentest your environment in order to ensure advanced-level security. This book is packed with practical recipes that will quickly get you started with Kali Linux (version 2018.4 / 2019), in addition to covering the core functionalities. The book will get you off to a strong start by introducing you to the installation and configuration of Kali Linux, which will help you to perform your tests. You will also learn how to plan attack strategies and perform web application exploitation using tools such as Burp and JexBoss. As you progress, you will get to grips with performing network exploitation using Metasploit, Sparta, and Wireshark. The book will also help you delve into the technique of carrying out wireless and password attacks using tools such as Patator, John the Ripper, and airoscript-ng. Later chapters will draw focus to the wide range of tools that help in forensics investigations and incident response mechanisms. As you wrap up the concluding chapters, you will learn to create an optimum quality pentest report. By the end of this book, you will be equipped with the knowledge you need to conduct advanced penetration testing, thanks to the book ' s crisp and task-oriented recipes. What you will learnLearn how to install, set up and customize Kali for pentesting on multiple platformsPentest routers and embedded devicesGet insights into fiddling around with software-defined radioPwn and escalate through a corporate networkWrite good quality security reportsExplore digital forensics and memory analysis with Kali LinuxWho this book is for If you are an IT security professional, pentester, or security analyst who wants to conduct advanced penetration testing techniques, then this book is for you. Featuring the work of six Canadian artists, this publication examines a recurring facet of contemporary artistic production: material excess, accumulation, bravado, asymmetry, and theatricality. The impact of such art is decidedly visual and primeval, with artists creating powerfully immersive environments aimed at enticing, challenging and even unsettling viewers.

Three essays discuss ornamentation, hybridity, material sensibilities, transformation and the sublime in contemporary art practice. With works by David Altmejd, Lee Bul, Bharti Kher, Tricia Middleton, Yinka Shonibare MBE, and Sarah Sze.
