In 1969, car
crashes killed
over 1000
Victorians. By
2016, the fatality
rate had been cut
by 85%, and
Victorians are
now taking

seriously the goal
of eliminating
death on the roads
altogether. This
extraordinary
achievement is the
product of
sustained and
ground-breaking
approaches to

preventing injury, saving lives, and optimising recovery. In 2001, the system to care for severely injured people received a major overhaul. The new Victorian State Trauma System halved the risk anyone injured would die, and became the envy of the world. From Roadside to Recovery is the story of the evolution, implementation, and impact of the Victorian State Trauma System, and those who championed it. This story shows what is possible when a community is determined to

address the tragedy and cost of road trauma. **Miscellaneous Female** Lulu.com The original muscle car, the Royal Bobcat GTO was the baby of a burgeoning Detroit subculture, one not sanctioned by the big automakers of the early 1960s. In a post-World War II America hungry for chrome, flash and speed, Royal Pontiac in Royal Oak, Michigan, modified and sold its souped-up versions of GTOs to customers, and in the process created a demand for custom street

racers in America. Founded by Ace Wilson, the Royal name became synonymous with speed. This book outlines the history of the Royal Bobcat GTO, from the people--including Milt Schornack, the mechanic who raced for Royal Pontiac and was responsible for the custom Bobcats--to the fabled midnight test runs on northern Detroit's famous Woodward Avenue. Fourteen chapters, illustrated with 25 photographs of vintage GTOs, the infamous Car &

Driver road test photos against a Ferrari GTO, and more, chronicle the history of a car that changed the focus of the Detroit auto industry for the next decade.

Mosquitoes, Communities, and Public Health in Texas focuses on 87 known species of mosquitoes found throughout

Texas. It includes information on the ecology, medical and public health importance, and biological diversity of each species. In addition, it provides detailed identification keys for both larval and adult stages of all mosquito genera and species known to occur in Texas, along a review of surveillance and control strategies. The expansion of invasive mosquitoes from other regions (including Mexico), together with climate change occurrences increase the likelihood for an increase in diseases, such as

West Nile Virus, Yellow Fever, Dengue, Chikungunya and Zika. This unique work is the first unified reference and resource rich in mosquito information for medical entomologists, mosquito and vector control professionals, pest management professionals, biologists, environmentalists, wildlife professionals, government regulators, instructors of medical entomology and public health professionals who have disease or vector responsibilities, mosquito taxonomists,

epidemiologists, entomology students, academia, pest control industry, and libraries, etc., with utility for medical, veterinary and health professionals. Brings into one volume the previously fragmented or unavailable information on the species of mosquitoes found in Texas and neighboring states of Mexico. Provides a variety of audiences with key data on mosquito biology, distribution and how to identify each. Includes a geographic distribution map, habitat associations, and

medical importance on Zika, West Nile virus, Dengue and Chikungunya for each species

Islamic Copyright Law Handbook Volume 1 Copyright Law In Selected Countries Featuring the work of six Canadian artists, this publication examines a

recurring facet of contemporary artistic production: material excess, accumulation, bravado, asymmetry, and theatricality. The impact of such art is decidedly visual and primeval, with artists creating powerfully immersive environments aimed at enticing, challenging and even unsettling viewers.

Three essays discuss ornamentation, hybridity, material sensibilities, transformation and the sublime in contemporary art practice. With works by David Altmejd, Lee Bul, Bharti Kher, Tricia Middleton, Yinka Shonibare MBE, and Sarah Sze. Catalogue accompanying an exhibition organized by the National

Gallery of Canada and the Art Gallery of Alberta, in collaboration with the Museum of Contemporary Canadian Art.

Luckily his church counselor recommends just the thing for his disillusionment, frustration, and rage: the solitude of Moondust Lake, a retreat just outside Miramar Bay. Kimberly Sturgiss is a professional psychotherapist whose tragic past has granted

her a rare ability to gently release her patients from their self-made prisons. She's well acquainted with the Helms family and the dark burdens that come with them. But the most intriguing challenge of all is Buddy. He and Kimberly share more than she's prepared to admit—the same emotional cage, the guarded heart, and

the broken trusts that come with being alive. Maybe it's finally time that Kimberly finds herself, too—by reaching out to the man who's reaching out to her. You will learn major concepts about the core programming language as well as common tasks faced while building a wide variety of software. You will learn about concepts such as concurrency, performance, meta-programming, lambda expressions, regular expressions, testing, and many more in the form of recipes. These recipes will ensure you can make your applications robust and fast. By the end of the book, you will understand the newer aspects of C++11/14/17 and will be able to overcome tasks that are time-consuming or would break your stride while developing. What you will learn Get to know about the new core language features and the problems they were intended to solve.
