Canon Rebel EOS T8i/850D User Guide

Silver Starz

The basic structure of the EOS Rebel

T8i/850D camera is similar to that of its predecessor

model EOS Rebel T6i. This camera

has a 24 Megapixel APS-C sensor. The

new generation sensor with a dual-chip can capture

very good images in high-contrast

conditions. Due to the presence of the

Dual-Chip CMOS AF sensor, it is much

faster and has a much larger

coverage area. It is possible to make

some good photos by using the Dual-Chip

CMOS AF sensor. It helps in improved

AF and AF-C performance as

compared to the EOS Rebel T6i.

Furthermore, the user can use this

camera in low-light situations. In the

photos captured in low light, it is

possible to see a very bright bokeh

effect. Also, it has better

autofocus ability than the EOS Rebel

T6i. The maximum ISO can be set up

to 16000 and the range of ISO

100-32000. Its electronic shutter

is faster than the EOS Rebel T6i. It

has a new AF algorithm that makes it possible to track the subject with very little user effort. The camera can also shoot videos in 4K resolution at 30 frames per second. The previous model EOS Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow

users to click portraits with no flash. The viewfinder and the rear LCD are always shown on the top plate and the sensitivity can be adjusted. This is the Manual you need to get started with using this camera seamlessly.
